CCAFS CORE W1_W2 ONLY

Title: Gender and Social Inclusion

Start date (dd-MM-yyyy)	01-01-2015	End date (dd-MM-yyyy)	31-12-2016
Management liaison	CU - Coordinating Unit	Mgmt. liaison contact	Huyer, Sophia <S.Huyer@CGIAR.ORG>
Lead organization	GSI - Gender and Social Inclusion Leader	Project leader	Huyer, Sophia <S.Huyer@CGIAR.ORG>
Project type	CCAFS CORE	Detailed project workplan	<Not defined>

Project is working on

Flaship(s)	Region(s)
FP2: Climate Information Services and Climate-Informed Safety Nets	Global: Global
FP1: Climate-smart practices	
FP3: Low Emissions Agricultural Development	
FP4: Policies and Institutions for Climate-Resilient Food Systems	

Bilateral project(s) contributing to this project

This project does not have Bilateral projects

Summary

This activity will support research, policy engagement and capacity enhancement across CCAFS on gender and other forms of social inequality, including class, age, race, ethnicity and occupation. CCAFS will address gender and social inclusion in all its Flagships. Gender and other inequalities undermine innovation and food security, and women and marginalised individuals and households are often more vulnerable to climate change. CCAFS will embrace strategies to reach women farmers in male-headed households, asset-poor female-headed households, youth in agriculture, and those marginalised on the basis of their livelihood activities, age, ethnicity, class or other factors. Adaptation and mitigation actions that benefit women and other social groups will be identified. The overall aim of the CCAFS gender strategy is to contribute to the gender and youth sub-IDOs (Increased control by women and youth of assets and resources, increased participation in decision-making, technology which decreases the labour burden of women and youth).

Partner	Hafkin, Nancy <nhafkin@wisat.org>	Collaboration on National Assessments on Gender and STI; provision of expertise on selected topics and products
---------	--------------------------------------	--

Partnerships overall performance over the last reporting period: There was a change in program leadership and management in 2015 which meant partners involved needed to become familiar with the program and processes involved. Partners performed as expected and above - supporting key research and communications activities as well as high level events focused on gender and social inclusion. New partners have also been identified.

Lessons regarding your partnerships and possible implications for the coming reporting cycle: Work on revising the Gender Strategy began in 2015 in line with programmatic changes implemented in 2014. The new Gender and Social Inclusion Strategy, to be finalized in 2016, will include a strengthened focus on youth in addition to gender equality. This may imply identifying new partners with experience working with youth or who are youth-focused.

Submitted on 2016-03-03 at 20:49 UTC

3. Locations

4. Outcomes

4.1 Project outcome narrative

Project outcome statement

GSI will connect up, provide support to, and synthesize research across Flagships and regions and identify broad patterns particularly in relation to women's and youth access to and control over resources, participation of women and youth in decision-making at different levels and the impact on CC adaptation and mitigation efforts. GSI will broaden its work on household decision-making and the impacts on household and community level efforts. GSI will also produce high-quality research related to gender trends, situation and opportunities in CSA, and gender and social inclusion in climate finance and global policy processes with a view to strengthening policies and related processes at national, sub-national and international levels. The Gender and CCAFS Climate Change Network will contribute to technical support and research on gender and social inclusion across Flagships and Regions.

Annual progress towards outcome (end of 2015): <Not defined>

Annual progress towards project outcome in the current reporting cycle (2015): Research across regions and flagships was supported by the new GSI team, the Gender and Climate Change Network and Gender Focal Points. Activities included inputs into project design (WA and SEA), meetings with CCAFS researchers and gender specialists and inputs into flagship gender research design for Phase 2 and the Phase 2 proposal. Plans were also initiated for synthesis activities on gender research in several flagships in 2016. A New Gender and Social Inclusion Strategy was drafted and reviewed by the Gender and CC Network, for implementation in 2016. The seminar, Gender, Climate Change and Agriculture: Closing the Gender Gap, was held in Paris in March 2015. Outputs fed into the policy brief Supporting women farmers in a changing climate: five policy lessons (Huyer et al 2015) which was launched to support policy processes and decision-making, including at COP21 and the Global Landscapes Forum. The chapter "Is the Gender Gap Narrowing in Science and Engineering?" in the 2015 UNESCO Science Report highlighted trends in representation of women in science and engineering, including a section on trends in agricultural sciences, in a global policy report and included policy recommendations for governments and the international system to promote gender parity. CCAFS supported gender and youth aspects in global policy through strengthening the Guide to UNFCCC Negotiations on Agriculture Toolkit for Communications and Outreach (Farming First 2015) from a gender and youth perspective to support policy negotiations towards COP21 and beyond; an analysis on gender and social justice in the INDCs was also submitted for COP21. The Gender and CC Network was established to promote collaborative research and programs; sharing of methods, tools, and approaches; and exchange of experience on project design, proposal writing, and implementation among researchers in the CGIAR.

Communication and engagement activities have contributed to achieving your Project outcomes: Establishment of the Gender and Climate Change Network provided a channel for communicating research across the CG centres and supporting the development of a new CCAFS GSI strategy. International Day of Rural Women, COP 21, GLF and Gender Perspectives Pavilion as well as collaboration with CIFOR and GGCA on case study collections provided avenues for broad dissemination of CCAFS research on GSI, including two policy briefs (Huyer et al 2015; Vermeulen, 2015), UNFCCC toolkit, CSA case studies on innovative approaches (e.g. participatory video with youth and CSA adoption by women's groups in Kenya), particularly in East Africa and Latin America.

Evidence documents of progress towards outcomes: [GSI Communications Report 2015.docx](#)

Annual progress towards outcome (end of 2016): The GSI Strategy and CCAFS Gender and CC network will be launched; pilot testing of the W+ standard will be completed; further analysis of Gender HH Survey will provide a baseline against which impact can be measured along with other CSA impact measurement methods; HH methodologies will be tested in relevant projects; tools will be made available on the CCAFS website to support projects and partners; research will be inputted in global policy opportunities.

Annual progress towards outcome (end of 2017): The CCAFS Gender and CC network will have strengthened capacity to support projects across CCAFS on GSI-related research; impact assessment methodologies will be adapted and shared with CCAFS projects; gender research will be integrated in regional impact pathways; gender analysis in design, implementation, and monitoring of results, including ex ante and ex poste analysis will be developed and tested across the programme. Products and inputs will be developed to promote gender equality in relevant global policy.

Annual progress towards outcome (end of 2018): <Not defined>

Lessons regarding your Theory of Change and implications for the coming planning cycle; e.g. how have your assumptions changed, or do you have stronger evidence for them: CCAFS gender research continues to identify specific gender trends in CSA and agricultural mitigation and adaptation. This has implications for the coming planning cycle include a growing focus on gender and social inclusion, including youth, and identification of important areas of further research and action..

4.2 Contribution to CCAFS Outcomes

FP1 - Outcome 2019: National and subnational development initiatives and public institutions prioritize and inform project implementation of equitable best bet CSA options using CCAFS science and decision support tools.

Indicator #1: FP1 Indicator: # of national and subnational development initiatives and public institutions that prioritize and inform project implementation of equitable best bet CSA options using CCAFS science and decision support tools

2019	
Target value: 0	Cumulative target to date: 8
Target narrative: <Not defined>	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>	

Submitted on 2016-03-03 at 20:49 UTC

2015		
Target value: 2	Cumulative target to date: 2	Target achieved: 2.0
Target narrative: <Not defined>		
Narrative for your achieved targets, including evidence: Public institutions - At least two of FAO, WB, IFAD will include CCAFS research and tools in their tools and publications supporting CSA.		
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>		
Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: - GSI contributed the module on Gender and Stakeholder Involvement based on CCAFS case studies and research to the World Bank CSA 101 website (to be completed in 2016). - Gender and Inclusion Toolkit disseminated widely. - Collaborated with FAO on a Practice Brief on Gender and CSA to be published in early 2016. - Contributed substantially to two chapters in the World Bank-IFAD-FAO Module on Gender and CSA published in 2015. - Contribution of chapter on analysis of global trends in gender and S&E in the UNESCO Science Report.		

2016		
Target value: 6	Cumulative target to date: 8	
Target narrative: 2 initiatives incorporating GSI (e.g. testing HH methodologies) will be shared with national and subnational development initiatives and lessons learned shared with CSA networks, across CCAFS regions and at the global level. 4 international agencies will continue to use CCAFS GSI tools – Toolbox, case studies, new approaches and tools arising from a gendered HH approach and building from evidence from Gender HH survey (e.g. FAO, CARE, IFAD, World Bank). A pillar on GSI will be developed for the CSA compendium. Gender-sensitive CSA approaches will also be shared through the CCAFS website, social media, journal articles, meetings and international fora.		
The expected annual gender and social inclusion contribution to this CCAFS Outcome: GSI focuses 100% on gender and social inclusion		

2014		
Target value: <Not defined>	Cumulative target to date: 0	Target achieved: <Not defined>
Target narrative: <Not defined>		
Narrative for your achieved targets, including evidence: <Not defined>		
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>		
Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: <Not defined>		

Submitted on 2016-03-03 at 20:49 UTC

FP4 - Outcome 2019: Appropriately directed institutional investment of regional/global organisations and processes (e.g. IFAD, WB, FAO, UNFCCC) based on national/regional engagement to learn about local climate smart food system priorities

Indicator #1: FP4 Indicator: # of regional/global organisations and processes that inform their equitable institutional investments in climate smart food systems using CCAFS outputs

2019	
Target value: <Not defined>	Cumulative target to date: 8
Target narrative: <Not defined>	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>	

2015		
Target value: 4	Cumulative target to date: 4	Target achieved: 4.0
Target narrative: <Not defined>		
<p>Narrative for your achieved targets, including evidence: - Over 3,200 downloads (across a number of countries) of the Gender and Inclusion Toolkit, one of the top 5 research highlights on the CCAFS website, and one of the top 10 most popular items in the Publications repository in 2015.</p> <p>- Gender and youth sections to strengthen the Guide to UNFCCC Negotiations on Agriculture Toolkit for Communications and Outreach, to support UNFCCC process and feed into COP21. Gender assessment of the INDCs undertaken.</p>		
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>		
<p>Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: Organizations using CCAFS Gender and Inclusion tools, research methodology and research outputs to inform their strategic planning and priority setting processes with consideration for gender and social inclusion (Global).</p>		

2016	
Target value: 4	Cumulative target to date: 8
<p>Target narrative: - IFAD, FAO, WB, and UNFCCC will benefit from research findings, good practices, and lessons learned on GSI integration in CSA and climate smart food systems approaches as well as lessons learned.</p> <p>- Will support strategic investments such as, e.g. capacity strengthening, institutional change and learning, human resource shift to consider GSI in relation to climate smart food systems.</p>	

Submitted on 2016-03-03 at 20:49 UTC

2016
The expected annual gender and social inclusion contribution to this CCAFS Outcome: GSI is 100% focused on gender and social inclusion.

2014		
Target value: <Not defined>	Cumulative target to date: 0	Target achieved: <Not defined>
Target narrative: <Not defined>		
Narrative for your achieved targets, including evidence: <Not defined>		
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>		
Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: <Not defined>		

FP4 - Outcome 2019: National/sub-national jurisdictions enact equitable food system policies and increase institutional investment that take into consideration climate smart practices/strategies, better articulated among themselves and in collaboration with private sector, civil society and researchers informed by CCAFS decision support tools

Indicator #1: FP4 Indicator: # of equitable national/subnational food system policies enacted that take into consideration climate smart practices and strategies

2019	
Target value: <Not defined>	Cumulative target to date: 4
Target narrative: <Not defined>	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>	

2015		
Target value: 2	Cumulative target to date: 2	Target achieved: 2.0
Target narrative: <Not defined>		
Narrative for your achieved targets, including evidence: CSA initiatives across different regions using CCAFS gender research and tools to strengthen CSA initiatives.		
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>		

Submitted on 2016-03-03 at 20:49 UTC

2015
Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: Kenya, Colombia and Costa Rica among other CCAFS countries are implementing CSA initiatives and continuing to strengthen work on gender and social inclusion - building from CCAFS gender research and tools.

2016	
Target value: 2	Cumulative target to date: 4
Target narrative: CCAFS CSA efforts are integrating GSI approaches and sharing lessons learned from CSVs with other jurisdictions including through media and international policy forums. Good practices and lessons learned are informing institutional investment, e.g. capacity strengthening, shifts in institutional culture, institutional knowledge and approaches etc.	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: GSI focuses 100% on gender and social inclusion.	

2014

Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: <Not defined>		

4.3 Other Contributions

Contribution to other CCAFS Impact Pathways

GSI contributes across Flagships and Regions so it will work across a number of Impact Pathways. This work will build on the GSI Strategy in development, and the regional impact pathways. It will support synthesis and comparison of results, methodologies and lessons learned across Regions and Flagships.

Collaborating with other CRPs: <Not defined>

Submitted on 2016-03-03 at 20:49 UTC

4.4 Outcome case studies

There is not an Outcome Case Study added.

5. Project outputs

5.1 Overview by MOGs

Major Output groups - 2019
<p>FP4 - MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues</p> <p>Brief bullet points of your expected annual 2019 contribution towards the selected MOG <Not defined></p> <p>Brief plan of the gender and social inclusion dimension of the expected annual output <Not defined></p>
<p>FP1 - MOG # 4: Innovative knowledge management systems (ICT, information network, multi-stakeholder platforms, learning alliances, fora etc) and strategic engagements approaches and partnerships that promote access, co-creation, capacity building, learning, 2 ways sharing and dissemination of CSA information and tools to farmers, extension services, agro-dealer networks, local governments, private sector, academia etc. (LAM, WA, EA, SA, SEA)</p> <p>Brief bullet points of your expected annual 2019 contribution towards the selected MOG <Not defined></p> <p>Brief plan of the gender and social inclusion dimension of the expected annual output <Not defined></p>
<p>FP1 - MOG # 1: Context specific (targeted) suitable CSA options and portfolios that build on traditional knowledge, meet the needs of farmers and enhance productivity, adaptive capacity, food security and social equity (LAM, WA, EA, SA, SEA)</p> <p>Brief bullet points of your expected annual 2019 contribution towards the selected MOG <Not defined></p> <p>Brief plan of the gender and social inclusion dimension of the expected annual output <Not defined></p>
<p>FP1 - MOG # 2: Biophysical, socio-economical and tradeoffs analyses (incl. enabling environments and gender), innovative methods, engagement approaches and customized decision support tools for CSA prioritization, wide scale adoption, local adaptation and investment planning (LAM, WA, EA, SA, SEA)</p> <p>Brief bullet points of your expected annual 2019 contribution towards the selected MOG <Not defined></p> <p>Brief plan of the gender and social inclusion dimension of the expected annual output <Not defined></p>

Brief bullet points of your expected annual 2015 contribution towards the selected MOG

<Not defined>

Brief summary of your actual 2015 contribution towards the selected MOG:

- Strengthened gender/youth aspects - Guide to UNFCCC Negotiations on Agriculture Toolkit (Farming First 2015).
- Gender Panel - GLF High Level Event, "From farmers' fields to landscapes: Food security in a new climate regime?"
- Analysis of GSI in the INDCs for COP21 (Richards et al, 2015)

Brief plan of the gender and social inclusion dimension of the expected annual output

<Not defined>

Summary of the gender and social inclusion dimension of the 2015 outputs:

All of GSI's work focuses on GSI - integrated and strategic research.

Major Output groups - 2016

FP4 - MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Brief bullet points of your expected annual 2016 contribution towards the selected MOG

- Pilot study in two regions of the W+ certification scheme (Nepal and country TBD)
- Collaboration on analysis and/or case study of the gender results in CSVs, as well as local and regional collaborations for policy, financing and social change
- National Assessments national studies analyses and results disseminated.

Brief plan of the gender and social inclusion dimension of the expected annual output

100% of GSI work is focused on gender and social inclusion.

FP1 - MOG # 4: Innovative knowledge management systems (ICT, information network, multi-stakeholder platforms, learning alliances, fora etc) and strategic engagements approaches and partnerships that promote access, co-creation, capacity building, learning, 2 ways sharing and dissemination of CSA information and tools to farmers, extension services, agro-dealer networks, local governments, private sector, academia etc. (LAM, WA, EA, SA, SEA)

Brief bullet points of your expected annual 2016 contribution towards the selected MOG

- Incorporate HH Decision-making approaches into CSA for more equitable household and community decision-making and CSA benefits
- Share case studies on innovative, gender-sensitive CSA practices and approaches through various fora at different levels and in different media (relevant to users).
- Work with flagships to synthesize learning and methodologies

Brief plan of the gender and social inclusion dimension of the expected annual output

100% of GSI work is focused on gender and social inclusion.

Submitted on 2016-03-03 at 20:49 UTC

FP1 - MOG # 1: Context specific (targeted) suitable CSA options and portfolios that build on traditional knowledge, meet the needs of farmers and enhance productivity, adaptive capacity, food security and social equity (LAM, WA, EA, SA, SEA)

Brief bullet points of your expected annual 2016 contribution towards the selected MOG

- Analysis of HH methodologies and their potential for improving women's participation in decision making at household levels,
- Scaling up CSA to meet the needs of women and youth farmers and enhance adaptive capacity, food security and social equality

Brief plan of the gender and social inclusion dimension of the expected annual output

GSI is focused 100% on gender and social inclusion.

FP1 - MOG # 2: Biophysical, socio-economical and tradeoffs analyses (incl. enabling environments and gender), innovative methods, engagement approaches and customized decision support tools for CSA prioritization, wide scale adoption, local adaptation and investment planning (LAM, WA, EA, SA, SEA)

Brief bullet points of your expected annual 2016 contribution towards the selected MOG

- Development of Gender pillar in CSA compendium of best practices

Brief plan of the gender and social inclusion dimension of the expected annual output

GSI is focused 100% on gender and social inclusion.

FP4 - MOG # 3: Effective supra-national governance systems and equitable engagement mechanisms between international and regional/national stakeholders to influence global policy and strengthened capacities to integrate local priorities into global fora

Brief bullet points of your expected annual 2016 contribution towards the selected MOG

- Pilot testing of W+ certification
- Development of knowledge products that strengthen supra-national governance systems and equitable engagement mechanisms.
- Work with Global Gender and Climate Alliance to highlight gender issues in CC advocacy
- Inputs to IFAD, FAO, World Bank and UNFCCC

Brief plan of the gender and social inclusion dimension of the expected annual output

100% of GSI work is focused on gender and social inclusion.

Lessons regarding your major outputs groups (MOGs) and possible implications for the coming planning cycle: For greater outreach and impact, need to integrate gender and social inclusion issues/speakers into high level events (e.g. GLF/COP panels, CCAFS booth). Experience from GLF, December 2015 - having a stand-alone gender session -- while sometimes important -- may only be attended by those with an interest in GSI while having the issues integrated into other panels ensures the issues are discussed among a wider audience. Collaborations with partners extends the reach and raises the profile of CCAFS GSI research.

5.2 Deliverables

Deliverable #1

Main Information	
Title: 'Gender and Climate Change Research in Agriculture and Food Security for Rural Development Training Guide'	
MOG # 4: Innovative knowledge management systems (ICT, information network, multi-stakeholder platforms, learning alliances, fora etc) and strategic engagements approaches and partnerships that promote access, co-creation, capacity building, learning, 2 ways sharing and dissemination of CSA information and tools to farmers, extension services, agro-dealer networks, local governments, private sector, academia etc. (LAM, WA, EA, SA, SEA)	
Main Type: Tools and Computer Software	Sub Type: Tools
Year of expected completion: 2015	
Status: Complete	

Next-user
FAO, IFAD and one or more national governments
Knowledge, attitude, skills and practice changes expected in next-user: Improved analytical capacity and policy-relevant knowledge base on gender
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Facilitation, engagement, knowledge sharing

Partners contributing to this deliverable
Partner #1 (Responsible): Jost, Christine <c.jost@cgiar.org>, ICRAF - World Agroforestry Centre

Deliverable Ranking	
Address gender and social inclusion aspect	5

Description: This manual is a resource and toolbox for NGO practitioners and programme designers interested in diagnostic and action research for gender sensitive and socially inclusive climate change programmes in the rural development context. It is meant to be an easy to use manual, increasing the research capacity, skills and knowledge of its users. Integrating gender and social differentiation frameworks should ideally begin from the start of the programme cycle and be coordinated throughout research, design, implementation, and monitoring and evaluation phases. The data gathered using this toolbox supports this programme work.

While the manual emphasizes participatory and qualitative approaches, many of the activities and tools can produce quantitative data. Each chapter features a bundle of research tools intended to be used sequentially. However, we know that each organization has its diverse needs. The chapters are in modular format so that teams can assemble their own research toolbox specific to their needs.

Deliverable #2**Main Information**

Title: Paris gender seminar: Closing the gender gap

MOG # 3: Effective supra-national governance systems and equitable engagement mechanisms between international and regional/national stakeholders to influence global policy and strengthened capacities to integrate local priorities into global fora

Main Type: Workshops

Sub Type: Workshop

Year of expected completion: 2015

Status: Complete

Next-user

International CC related government and non-government organisations, research community, policy makers

Submitted on 2016-03-03 at 20:49 UTC

Knowledge, attitude, skills and practice changes expected in next-user: Raised awareness of issues around gender and social inequalities, including a stronger factual base to support political arguments

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Strong use of social media and live streaming to increased the reach of the seminar and its reported research findings.

Deliverable Metadata

Description: In March, CCAFS organized a high-level event where researchers from CGIAR and partners shared cutting-edge knowledge on research on gender, climate change, agriculture and food security. Objectives included:

- Share key research results related to gender, climate change, agriculture and food security.
- Discuss how such results are being used or could be used to reduce gender inequalities including their implications for policy and programs.
- Identify key gaps in the research that still need to be addressed to achieve optimal gender inclusion.
- Identify appropriate frameworks and methods for collecting and analyzing data around the topics of gender and climate change.
- Networking for building potential partnership and/or strengthening existing partnerships.

Deliverable #3

Main Information
Title: Collection of 4 policy briefs summarizing the results of country reports
MOG # 4: Innovative knowledge management systems (ICT, information network, multi-stakeholder platforms, learning alliances, fora etc) and strategic engagements approaches and partnerships that promote access, co-creation, capacity building, learning, 2 ways sharing and dissemination of CSA information and tools to farmers, extension services, agro-dealer networks, local governments, private sector, academia etc. (LAM, WA, EA, SA, SEA)
Main Type: Reports, Reference Materials and Other Papers
Sub Type: Policy briefs - Briefing paper
Year of expected completion: 2015
Status: Cancelled
Justification for cancelling the deliverable: New GSI team unable to find evidence of this deliverable so we assume it did not happen.

Next-user #1
Five development agencies
Knowledge, attitude, skills and practice changes expected in next-user: Better awareness and understanding of gender differences in climate vulnerability and preferences for adaptation practices
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: We will provide the policy briefs to our contacts within the 5 development agencies

Next-user #2
Polymakers
Knowledge, attitude, skills and practice changes expected in next-user: Better awareness and understanding of gender differences in climate vulnerability and preferences for adaptation practices
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: We send the briefs to our network of partners in the case study countries and will liaise with CCAFS regional leaders and IFPRI regional offices for additional policy contacts to reach out to.

Submitted on 2016-03-03 at 20:49 UTC

Next-user #3
Researchers and international climate change actors
Knowledge, attitude, skills and practice changes expected in next-user: Better awareness and understanding of gender differences in climate vulnerability and preferences for adaptation practices
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: We will display policy briefs at high profile events (e.g. COP21). We will also post the briefs online on various IFPRI and CCAFS websites and blogs

Deliverable #4

Main Information	
Title: Report on key informant interviews and assessment of internal documents/reports of 5 development agencies	
MOG # 4: Innovative knowledge management systems (ICT, information network, multi-stakeholder platforms, learning alliances, fora etc) and strategic engagements approaches and partnerships that promote access, co-creation, capacity building, learning, 2 ways sharing and dissemination of CSA information and tools to farmers, extension services, agro-dealer networks, local governments, private sector, academia etc. (LAM, WA, EA, SA, SEA)	
Main Type: Reports, Reference Materials and Other Papers	Sub Type: Research report
Year of expected completion: 2015	
Status: Extended	Justification for cancelling the deliverable: Expected publication in 2016.

Next-user
Five development agencies
Knowledge, attitude, skills and practice changes expected in next-user: The report will increase awareness and understanding of gender differences in climate vulnerability and preferences for adaptation practices. It will also help development agencies reflect on their own gender strategies and approaches to adaptation projects.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: We will engage staff working on climate change adaptation projects within the 5 development agencies in one-on-one dialogue on approaches to gender-sensitive adaptation programs. . The Development of training materials and/or tools based on assessment will be done with input from staff.

Deliverable #14

Main Information	
Title: Integrating Gender in Mechanisms and Tools to Facilitate the Operationalization of CSA	
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues	
Main Type: Tools and Computer Software	Sub Type: Tools
Year of expected completion: 2016	

Submitted on 2016-03-03 at 20:49 UTC

Status: On-going	Justification for cancelling the deliverable: Integrated gender into WB CSA 101 website which is being launched in 2016.
-------------------------	--

Next-user #1
World Bank personnel
Knowledge, attitude, skills and practice changes expected in next-user: Tools and guidelines for integrating gender in climate change related agricultural funding at national level.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Integration of gender into World Bank tools and mechanisms.

Next-user #2
Countries receiving funding from the World Bank for agriculture activities
Knowledge, attitude, skills and practice changes expected in next-user: Better integration of gender concerns into national level agriculture activities.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Integration of gender into World Bank tools and mechanisms.

Deliverable #15

Main Information
Title: National Assessments on Gender, Science, Technology and Innovation
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues
Main Type: Data and information outputs, including datasets, databases and models
Sub Type: Information outputs
Year of expected completion: 2016
Status: On-going
Justification for cancelling the deliverable: In process with WISAT.

Next-user
Governments, researchers, civil society
Knowledge, attitude, skills and practice changes expected in next-user: Understanding of the representation of women in key sectors related to agriculture, climate change, STI and the importance of gender-responsive policy and programming to increase their representation.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Knowledge sharing, presentations at international fora, and collaboration with national groups.

Deliverable #16

Main Information
Title: Closing the gender gap in climate-smart agriculture
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Submitted on 2016-03-03 at 20:49 UTC

Main Type: Reports, Reference Materials and Other Papers	Sub Type: Other non-peer reviewed articles
Year of expected completion: 2015	
Status: Complete	

Next-user
Researchers, implementers, decision-makers
Knowledge, attitude, skills and practice changes expected in next-user: Strengthened understanding that policy-relevant evidence on gender and CSA must go beyond adoption of technologies to consider the politics of resource access and decision-making; that institutions bringing about gender-equitable CSA will emphasize women's participation, leadership and capacity building; emerging CSA policies are weak on gender..
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: The Info note to be shared through CCAFS website and networks (CCAFS, CG), dissemination via social media and various fora in which CCAFS participates.

Description: Climate-smart agriculture (CSA) has become a central concept shaping action and bringing together constituencies at the global level on agriculture and climate change. In essence, climate-smart agriculture pays explicit attention to how interventions in agriculture and food systems affect each of three key outcomes: food security, adaptation and mitigation (FAO 2013). The climate-smart agriculture movement is not prescriptive about how best to achieve these outcomes, nor how to manage the inevitable trade-offs – the idea is that locally appropriate priorities and solutions will be generated. A key question arises as to the winners and losers from these processes, in terms of gender as well as other social dimensions, and whether climate-smart agriculture help transform agriculture and rural development in ways that achieve major gains for gender equity.

Description: While women play an important role in agriculture, environmental and natural resource management, they have greater financial or resource constraints, and lower levels of access to information and extension services than men (Tall et al. 2014). Because of these gender inequalities, women appear to be less able to adapt to climate change (Huyer et al. 2015). Rural women's workload, e.g. biomass and water collection, is affected by natural disasters and the changing climate with consequences on family nutrition, childcare and education. Cultural norms related to gender roles may limit the ability of women to respond to or make quick decisions in the face of climate events. For example, in some households where men are working off-farm in cities, women may lack the power to make timely farming decisions or to convince their husbands to agree to new practices (Asfaw et al. 2015; Goering 2015).

5.3 Summary on next-users

Next user #1
<p>Key next user for the current reporting period. Key game changers. Observed Knowledge, Attitude, Skills and practice changes: The World Bank has become active on CSA issues at many levels - from community to global policy level -- and work with a diverse range of stakeholders. This provides many avenues for information sharing, learning and collaboration. The Bank began to develop the CSA 101 Website and recognized the importance of including gender and social inclusion. CCAFS case studies and resources on GSI have been included in the CSA 101 site. CCAFS also contributed chapters on gender and CSA and ICT/information services to the World Bank Module on Gender and CSA.</p>
<p>Strategies (facilitation, engagement, knowledge sharing etc.) you used to encourage and enable this next user to utilize deliverables and adopt changes: CCAFS cooperated with the World Bank to develop the CSA 101 site, sharing information and resources. GSI reviewed draft chapters of the CSA module and as a result was requested to write the gender and ICT section in addition to the gender and CSA section.</p>
<p>Reported deliverables serve as evidence towards this achieved change: - Inputs to CSA 101 website to be launched in 2016 - World Bank; FAO; IFAD. 2015. Gender in climate-smart agriculture : module 18 for gender in agriculture sourcebook. Agriculture global practice. Washington, D.C. : World Bank Group. http://documents.worldbank.org/curated/en/2015/10/25135830/gender-climate-smart-agriculture-module-18-gender-agriculture-sourcebook</p>
<p>Lessons and implications for the next planning cycle: CCAFS research is well-renowned and has wide reach. As CCAFS moves toward more gender transformative and applied research, there will be several well-placed avenues for dissemination including partners like the World Bank.</p>
Next user #2
<p>Key next user for the current reporting period. Key game changers. Observed Knowledge, Attitude, Skills and practice changes: Researchers working on climate change, agriculture and food security -- from CCAFS, partners, and other organizations. They are directly involved in cc research and therefore key for taking on gender and social inclusion issues. Downloads of Gender and Social Inclusion Toolbox demonstrates high level of interest of CCAFS GSI tools and interest in change, increasing inclusion of GSI issues in ongoing or planned research across CCAFS Flagships/Regions.</p>
<p>Strategies (facilitation, engagement, knowledge sharing etc.) you used to encourage and enable this next user to utilize deliverables and adopt changes: Collaboration with partner research organizations; knowledge sharing via CCAFS website, social media, high level events, webinars, publications of CCAFS GSI research.</p>
<p>Reported deliverables serve as evidence towards this achieved change: Jost C, Ferdous N, Spicer TD 2014. Gender and Inclusion Toolbox: Participatory Research in Climate Change and Agriculture. Copenhagen, Denmark: CGIAR Research Program on Climate Change, Agriculture and Food Security (CCAFS); CARE International and the World Agroforestry Centre (ICRAF). Huyer S, Twyman J, Koningstein M, Ashby J, Vermeulen SJ. 2015. Supporting women farmers in a changing climate: five policy lessons. CCAFS Policy Brief 10. CGIAR Research Program on Climate Change, Agriculture and Food Security (CCAFS).</p>
<p>Lessons and implications for the next planning cycle: GSI will build on collaborations to extend the impact of its research and to mobilize resources.</p>

Submitted on 2016-03-03 at 20:49 UTC

5.4 Project highlights

Project highlight Information #1	
Title: Supporting women farmers in a changing climate: five policy lessons.	
Author: Huyer S, Twyman J, Koningstein M, Ashby J, Vermeulen SJ	Subject: Climate Change Policy
Publisher: CCAFS	Year: 2015
Project highlights types Gender and social inclusion Policy engagement	Start date: 2016-02-25
End date: 2016-02-25	Is global: Yes
Country:	Keywords: gender, policy, climate change, recommendations
<p>Highlight description: Policies, institutions and services to help farmers develop new approaches to deal with climate change will need to produce results for women farmers as well as men. This brief provides five policy lessons to support this process, based on evidence from research in low- and middle- income countries and offers guidelines for crafting gender-responsive climate policies at global and national levels. This research was presented in March 2015 at a seminar in Paris on 'Closing the gender gap in farming under climate change', co-organized by the CGIAR Research Program on Climate Change, Agriculture and Food Security (CAAFS), the International Social Science Council (ISSC) and Future Earth.</p>	
<p>Introduction / Objectives: The Policy Brief builds on the research presented at the Closing the Gender Gap in Farming under Climate Change" seminar held in Paris in March 2015.</p>	
<p>Results: The brief was disseminated widely -- first launched at the International Day of Rural Women, October 15 2015, and at COP21 and the Global Landscapes Forum.</p>	
<p>Partners: <Not defined></p>	
<p>Links / Sources for further information: https://cgspace.cgiar.org/handle/10568/68533 https://ccafs.cgiar.org/closing-gender-gap#.Vs53KdD_Ffc</p>	

Submitted on 2016-03-03 at 20:49 UTC

Project highlight Information #1	
Title: GLF Side event: From farmer's fields to landscapes: / Food systems under climate change: How can the Paris agreement address food security and sustainable development in a new climate regime?	
Author: Huyer, S	Subject: gender, policy, climate, COP21, social inclusion
Publisher: <Not defined>	Year: 2015
Project highlights types Successful communications Gender and social inclusion Policy engagement	Start date: 2015-12-06
End date: 2015-12-06	Is global: Yes
Country:	Keywords: gender, social inclusion, youth, policy, COP21, UNFCCC
<p>Highlight description: At the Global Landscapes Forum (GLF) held 6 December 2015 in Paris, CCAFS co-organized a high level side event, From farmer's fields to landscapes: / Food systems under climate change: How can the Paris agreement address food security and sustainable development in a new climate regime? The side event included a panel event on gender, youth, the INDCs, and food security. The panel event followed from the morning's earlier discussions on the implications for food security, agriculture and land use in relation to the INDCs and discussed the implications for gender and social inclusion.</p> <p>Speakers on the gender panel included: Sithembile Ndema Mwamakamba (FANRPAN), Philippe Lévêque, Executive Director (CARE France), Giovanna Valverde (Climate Change Office, Ministry of Foreign Relations, Costa Rica) and Sophia Huyer, CCAFS.</p>	
<p>Introduction / Objectives: While gender receives attention in the INDCs, only 57 Parties have mentioned it. Gender references are confined mostly to the impacts of climate change and there is less emphasis on supporting women to address and participate in adaptation and mitigation actions. The panel sought to draw attention to some of these issues and contribute to policy dialogue. GSI is now developing an information note on Gender and COP21 which will help inform the SBSTTA meeting in early 2016.</p>	
<p>Results: - Policy dialogue - panel members and participants - INDC analysis from a gender perspective</p>	
<p>Partners: FANRPAN, CARE France, Ministry of Foreign Relations, Costa Rica all participated in the Gender Panel of the Side Event.</p>	
<p>Links / Sources for further information: https://ccafs.cgiar.org/global-landscapes-forum-2015#.VtXv04-cFM</p>

Project highlight Information #1	
Title: Closing the Gender Gap - High level seminar on gender, climate change and agriculture	
Author: CCAFS	Subject: gender, policy, climate, COP21, social inclusion, mitigation, adaptation
Publisher: CCAFS	Year: 2015
Project highlights types Gender and social inclusion Capacity enhancement	Start date: 2015-03-19
End date: 2015-03-19	Is global: Yes
Country:	Keywords: gender, policy, climate, COP21, social inclusion, mitigation, adaptation, CSA, social inclusion, microinsurance, REDD+, climate services, climate information
Highlight description: Scientists and practitioners shared new knowledge on gender and climate change in agriculture.	
<p>Introduction / Objectives: Share key research results related to gender, climate change, agriculture and food security.</p> <p>Discuss how such results are being used or could be used to reduce gender inequalities including their implications for policy and programs.</p> <p>Identify key gaps in the research that still need to be addressed to achieve optimal gender inclusion.</p> <p>Identify appropriate frameworks and methods for collecting and analyzing data around the topics of gender and climate change.</p> <p>Networking for building potential partnership and/or strengthening existing partnerships.</p>	
<p>Results: Resulted in the policy brief, Huyer S, Twyman J, Koningstein M, Ashby J and Vermeulen S. 2015. Supporting women farmers in a changing climate: five policy lessons. CCAFS Policy Brief no. 10. Copenhagen, Denmark: CGIAR Research Program on Climate Change, Agriculture and Food Security (CAAFS). https://cgspace.cgiar.org/handle/10568/68533</p>	
Partners: Future Earth, International Social Science Council (ISSC), CG Consortium, CIAT

Project highlight Information #1	
Title: CCAFS Gender and Climate Change Network	
Author: CCAFS	Subject: gender, social inclusion, climate change
Publisher: <Not defined>	Year: 2015
Project highlights types Gender and social inclusion Capacity enhancement	Start date: 2015-10-01
End date: 2016-12-31	Is global: Yes
Country:	Keywords: <Not defined>
<p>Highlight description: GSI-CCAFS used the Network to hold an interactive webinar for Gender and Climate Change focal points as a part of the process of consultation to draft the new Gender and Social Inclusion Strategy. The webinar provided: an overview of the draft strategy and Theory of Change for inputs and comments; an introduction of idea of a Gender and Climate Change network for consideration by participants; and a brief overview of GSI events at COP21 and the Global Land Forum. Participants provided contributions to the GSI strategy through the discussion and follow-up e-mails. A video was posted 1 October 2015 and has received 28 views (observed 11 January 2016).</p>	
<p>Introduction / Objectives: Contributions to outcomes: Established October, 2015, the GCC Network supports the development and implementation of CCAFS Gender and Social Inclusion (GSI) Strategy across flagships, regions, and centres. It acts as platform for exchange and discussion around research, methodologies, issues, publications, events, related to gender and CC in the CG system. It also acts as a platform for inputs into the CCAFS Gender Strategy and activities and is only accessible to CG researchers (and selected working partners).</p>	
<p>Results: - The Gender and CC network has provided inputs to the Gender and Social Inclusion Strategy which will be launched in 2016.</p> <ul style="list-style-type: none"> - Members participated in a webinar on the strategy. - Resources and information has been shared with the group by different members and the GSI team. - A google group has been established for the group. 	
<p>Partners: The network currently has 59 members who are primarily gender and climate change focal points from 20 CG or CCAFS-related organizations (including GSI staff).</p>

6. Activities

Activity #1	
Title: Gender and Climate Change Research in Agriculture and Food Security for Rural Development Training Guide	
Description: Training and capacity building working with a strategic group of partners: FAO, CCAFS, CARE, IFAD, We Effect and GROOTS.	
Start date (dd-MM-yyyy): 01-01-2015	End date (dd-MM-yyyy): 31-12-2015
Leader: Vermeulen, Sonja <s.vermeulen@cgiar.org>, KU - Københavns Universitet	
Status: Complete	

Activity #2	
Title: Paris gender seminar	
Description: A high-level seminar to raise the profile of gender in climate change, agriculture and food security ahead of the Paris COP and linked to the Montpellier CSA Science Conference	
Start date (dd-MM-yyyy): 01-01-2015	End date (dd-MM-yyyy): 15-03-2015
Leader: Vermeulen, Sonja <s.vermeulen@cgiar.org>, KU - Københavns Universitet	
Status: Complete	

Activity #3	
Title: Gendered approach to climate adaptation	
Description: This activity will involve several sub-activities:	
1: Hone key messages gender and climate change <ul style="list-style-type: none"> • Refine and expand on key messages from country reports • Develop a set of policy notes highlighting the key findings 	
2: Identify capacity needs of targeted development agencies <ul style="list-style-type: none"> • Conduct key informant interviews (KIIs) with staff working within selected development agencies • Collect and review internal reports/documents on gender considerations in adaptation projects • Prepare report on capacity and information needs of selected development agencies • Share recommendations, tools, and information with development agencies based on findings 	
3: Outreach and communications <ul style="list-style-type: none"> • Participate in high profile events leading to COP21 in Paris • Add tools from the CCAFS gender and climate change project to IFPRI's gender and climate change toolkit • Update IFPRI's gender and climate change blog and link with CCAFS communications team 	
Start date (dd-MM-yyyy): 01-01-2015	End date (dd-MM-yyyy): 31-12-2015

Submitted on 2016-03-03 at 20:49 UTC

Leader: Ringler, Claudia <C.RINGLER@CGIAR.ORG>, IFPRI - International Food Policy Research Institute

Status: Complete

Activity #4

Title: Coordination activity previous Theme 4.1

Description: Reporting on Theme 4.1 outcomes, case studies and activities

Start date (dd-MM-yyyy): 01-01-2015

End date (dd-MM-yyyy): 31-03-2015

Leader: Jost, Christine <c.jost@cgiar.org>, ICRAF - World Agroforestry Centre

Status: Complete

Activity #5

Title: GSI in CSA: Practice Brief

Description: Joint development of a practice brief with FAO.

Start date (dd-MM-yyyy): 04-01-2016

End date (dd-MM-yyyy): 06-06-2016

Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader

Status: On-going

Justification: Forthcoming in March or April 2016.

Activity #6

Title: The potential of HH methodologies in scaling up CSA

Description: - Explore the potential of HH methodologies for scaling up CSA with World Bank, IFAD (other relevant organizations as needed)
- Identify methodologies, processes and approaches to include gender equity and equality in development of mechanisms and tools to facilitate the operationalization of CSA

Start date (dd-MM-yyyy): 01-03-2016

End date (dd-MM-yyyy): 30-06-2016

Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader

Status: On-going

Justification: Has been developed into a longer project with CIMMYT who submitted a concept note early 2016.

Activity #7

Title: GSI in Climate Smart Villages

Description: Collaboration with Ecohabitats on analysis and/or case study of the gender results in a CSV in Colombia, as well as local and regional collaborations for policy, financing and social change.

Start date (dd-MM-yyyy): 01-03-2016

End date (dd-MM-yyyy): 01-10-2016

Submitted on 2016-03-03 at 20:49 UTC

Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	
Status: On-going	Justification: The work will be considered in the Workshop being planned for 2016 on CSA.

Activity #8	
Title: GSI in CCAFS: Lessons, good practices, and implications for scaling up	
Description: This activity will include a workshop which will bring together CCAFS staff/partners from different initiatives across regions and flagships to share and document learning (approaches, challenges, good practices, scaling up, etc.). Outputs of the workshop will include a conceptual framework for designing and implementing CSA projects and measuring impacts. Outputs will be disseminated through appropriate pathways such as papers, policy briefs, journal articles, blogs, social media, posters, videos, etc. (and other relevant media to be identified).	
Start date (dd-MM-yyyy): 02-05-2016	End date (dd-MM-yyyy): 30-09-2016
Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	
Status: On-going	Justification: Workshop for F1 in planning for 2016 and possibly F4. F2 synthesis also will be undertaken (Sophia Huyer with F2).

Activity #9	
Title: Outreach and communications	
Description: This will be an ongoing activity throughout the year to support the publication (in different formats) and dissemination of CCAFS research highlighting GSI -- through papers, briefs, journal articles, blogs, participation at high-level events, regional fora, updating of website, CCAFS, CG, and external networks and platforms, etc.	
Start date (dd-MM-yyyy): 01-01-2016	End date (dd-MM-yyyy): 31-12-2016
Leader: Hill, Catherine <C.Hill@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	
Status: On-going	Justification: Info papers and working papers produced or in line for production in 2016. International events - International Women's Day - photo exposure and OpEd piece by Sophia Huyer planned. Will undertake a communications event on youth for Youth Skills Day (July 2016). International Day of Rural Women also will follow up on the work undertaken in 2016.

Activity #10	
Title: Reporting 2015	
Description: Coordinating reporting of GSI-related activities from 2015.	
Start date (dd-MM-yyyy): 04-01-2016	End date (dd-MM-yyyy): 30-04-2016
Leader: Hill, Catherine <C.Hill@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	

Submitted on 2016-03-03 at 20:49 UTC

Status: On-going	Justification: Being completed with submission of these inputs to P&R.
-------------------------	---

Activity #11	
Title: W+	
Description: Contribute to a pilot study in Nepal of the W+ certification scheme.	
Start date (dd-MM-yyyy): 02-05-2016	End date (dd-MM-yyyy): 30-09-2016
Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	
Status: On-going	Justification: In discussion with WOCAN on W+ potential in Nepal.

Activity #12	
Title: National Assessments on Gender, Science, Technology and Innovation	
Description: Revision of the Gender Equality - Knowledge Society indicator framework to include indicators on: women's representation in agricultural sciences, transportation and energy; child and maternal nutrition levels. Addition of 3 national datasets.	
Start date (dd-MM-yyyy): 01-12-2015	End date (dd-MM-yyyy): 31-12-2016
Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	
Status: On-going	Justification: Underway with WISAT.

Activity #13	
Title: Ongoing support to Flagships and Regional Programmes	
Description: GSI Unit to provide support in conceptualizing and synthesizing current and planned gender activities in Flagships, inputs and advice on project activity to increase gender results; and support in measuring and achieving programme targets.	
Start date (dd-MM-yyyy): 01-12-2016	End date (dd-MM-yyyy): 31-12-2016
Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	
Status: On-going	Justification: New Gender and Social Inclusion Strategy to be launched in 2016 to support the Flagships and Regional Programmes. A series of workshops/writesops also planned to synthesize learning from across the Flagships/Regions.

Activity #14	
Title: Addressing gender challenges in agricultural research for development in the face of a changing climate	

Submitted on 2016-03-03 at 20:49 UTC

Description: The objective of this initiative is to review gender methods, tools, and/or approaches, recently developed and applied by CGIAR/CCAFS researchers to better understand key gender-related research questions, methods and outcomes from different methods for integrating gender and social inclusion to agriculture and climate change research (in relation to the CGAIR gender and youth intermediate development outcomes (IDOs of increased control of productive resources, participation in decision making, empowerment, etc.).	
Start date (dd-MM-yyyy): 09-10-2015	End date (dd-MM-yyyy): 30-11-2015
Leader: Huyer, Sophia <S.Huyer@CGIAR.ORG>, GSI - Gender and Social Inclusion Leader	
Status: Extended	Justification: Expected date of completion April 2016. Awaiting inputs from other researchers to finalize research.

Lessons regarding your project activities and possible implications for the coming planning cycle: New GSI team came on board in 2015 so took a bit of time to come up to speed with planned/ongoing activities. Budget cuts may affect implementation of planned activities in 2016. Reduced budget and increased need to focus on social inclusion issues (youth) as well as gender will create challenges for ensuring quality inclusion of these issues in CC research.

Submitted on 2016-03-03 at 20:49 UTC

7. Leverages

Leverage #1	
Title: CCAFS FAO CSA Practice Brief	
Partner name: FAO - Food and Agriculture Organization of the United Nations - Italy	
Year: 2015	
Flagship: FP4: Policies and Institutions for Climate-Resilient Food Systems	Budget: US \$20,000.00

Leverage #2	
Title: Gender in climate-smart agriculture : module 18 for gender in agriculture sourcebook.	
Partner name: The World Bank - United States	
Year: 2015	
Flagship: FP4: Policies and Institutions for Climate-Resilient Food Systems	Budget: US \$30,000.00
