CCAFS CORE W1_W2 ONLY

Title: CCAFS scenario-guided policy and investment planning

Start date (dd-MM-yyyy)	01-01-2011	**End date (dd-MM-yyyy)**	31-12-2016
Management liaison	F4 - Flagship 4	**Mgmt. liaison contact**	Thornton, Philip <p.thornton@cgiar.org>
Lead organization	University of Oxford - University of Oxford - United Kingdom	**Project leader**	Vervoort, Joost <joost.vervoort@eci.ox.ac.uk>
Project type	CCAFS CORE	**Detailed project workplan**	<Not defined>

Project is working on

Flaship(s)	Region(s)
FP4: Policies and Institutions for Climate-Resilient Food Systems	RP EA: East Africa
	Global: Global
	RP LAM: Latin America
	RP SAs: South Asia
	RP SEA: South East Asia
	RP WA: West Africa

Bilateral project(s) contributing to this project
This project does not have Bilateral projects

Summary
The CCAFS scenarios program has developed socio-economic and climate scenarios as a tool for strategic planning with decision-makers in East and West Africa, South and Southeast Asia, the Andes and Central America, which have been quantified through IMPACT/GLOBIOM and linked to the SSPs/RCPs. CCAFS facilitated the use of these scenarios to test and develop policies and investment plans in these regions, to help create plans that are robust and provide "no-regrets" options in the face of diverse futures. These now include finalized plans and policies in Cambodia, Honduras, Costa Rica and Bangladesh, with strong work on-going on policies in Burkina Faso, Uganda and Tanzania, and additionally, the Bangladesh NAP. The CCAFS scenarios program has been supported by a

number of global partnerships, notably UNEP WCMC, FAO and Oxfam GB. Existing and new policy engagements and global collaborations will be developed in 2016.

2. Partners

Partner #1

Institution: CIAT - Centro Internacional de Agricultura Tropical

Contacts

Type	Contact	Responsibilities and contributions
Partner	Martinez, Deissy <d.m.baron@cgiar.org>	CCAFS Latin America will be funding the University for International Cooperation (UCI), where a team drives the scenarios research program in Latin America. They will provide further support in the process by identifying regional priorities, attending workshops and identifying partners for policy guidance in Latin America.

Partner #2

Institution: IRRI - International Rice Research Institute

Contacts

Type	Contact	Responsibilities and contributions
Partner	Leocadio, Sebastian <l.sebastian@irri.org>	CCAF Southeast Asia will fund a consultant to drive regional pathways toward outcomes in Cambodia, Vietnam and Myanmar as well as collaboration with FP4. CCAFS SEA will also provide guidance on regional priorities and key contacts.
Partner	Peou, Rathana <rathana.pvdh@gmail.com>	Activity 2014-96 *Leader*.

Partner #3

Institution: ICRISAT - International Crops Research Institute for the Semi-Arid Tropics

Contacts

Type	Contact	Responsibilities and contributions
Partner	Zougmore, Robert <R.Zougmore@cgiar.org>	Activity 2014-99 *Partner*.

Partner	Saley Moussa, Abdoulaye <a.s.Moussa@cgiar.org>	Specify partner responsibilities: CCAFS West Africa will support scenario-guided policy development impact pathways in Ghana and Burkina Faso/Niger, as well as facilitate ECOWAS support for these processes – participating and co-facilitating scenario meetings. CCAFS West Africa will fund a multi-level policy workshop in Burkina Faso/Niger.

Partner #4

Institution: IWMI - International Water Management Institute

Contacts

Type	Contact	Responsibilities and contributions
Partner	Khatri Chhetri, Arun <A.Khatri-Chhetri@cgiar.org>	Specify partner responsibilities: CCAFS South Asia will support the work of the scenarios team on a Bangladesh impact pathway as well as other opportunities for the use of scenarios in South Asia, participating in meetings as necessary, indicating regional priorities, and providing regional research and key contacts.

Partner #5

Institution: ILRI - International Livestock Research Institute

Contacts

Type	Contact	Responsibilities and contributions
Partner	Radeny, Maren <M.Radeny@cgiar.org>	In East Africa, the CCAFS scenarios project focuses primarily on policy guidance in Uganda and additionally on Rwanda, Burundi and Tanzania, through a partnership with UNEP WCMC and by supporting the IITA FP4 project. CCAFS East Africa will support these processes by indicating regional priorities and providing regional contacts.

Partner #6 (Leader)

Institution: University of Oxford - University of Oxford

CCAFS Partner(s) allocating budget: <Not defined>

Contacts

Type	Contact	Responsibilities and contributions

Project Leader	Vervoort, Joost <joost.vervoort@eci.ox.ac.uk>	Activity 2014-11 *Partner*. Activity 2014-96 *Partner*.

Partner	Thornton, Philip <p.thornton@cgiar.org>	Funding and collaboration.

Partnerships overall performance over the last reporting period: Due to clear agreements and a clear understanding of benefits of collaboration, partners have performed as expected. The University of International Cooperation has performed particularly brilliantly and proactively.

Lessons regarding your partnerships and possible implications for the coming reporting cycle: Partnerships have benefitted from multi-year collaborations.

4. Outcomes

4.1 Project outcome narrative

Project outcome statement
By 2019, at least 5 national climate-smart agriculture/food systems policies have been finalized and are being implemented that have been developed and tested against scenarios to make them more robust in the face of multiple climate/socio-economic futures (FP4 outcome indicator 1). At least 5 major regional/global organizations have used scenarios outputs and methodology in their priority setting and policy guidance (FP4 outcome indicator 2).

Annual progress towards outcome (end of 2015): In 2015 and building on work in 2014 and 2013, policies tested and developed in the context of the CCAFS regional scenarios in at least 4 regional/national case studies in 2014 will be revised in drafts that will be accepted and finalized, or have a concrete potential to be accepted and finalized in 2016. The Cambodian government's CCPAP plan, signed in 2014, will be initiated with a focus on scenario-guided Climate Smart Agriculture, with support in methodology and outputs from the CCAFS scenarios project. At least 4 regional/global organizations will have used CCAFS scenarios methodology and outputs to start informing their strategic planning and priority setting processes.

FOR REPORTING IN AUG 2015: Honduras's SAG agricultural climate adaptation plan (GRACC + ACC) to be completed and reviewed in the light of the CCAFS scenarios work. Similar policy outcomes to be reported in Bangladesh (GED/NAP), Cambodia (CCPAP implementation), Colombia (ag adaptation plan) and progress in several high-potential African cases (Ghana, Burkina Faso, Tanzania, Uganda).

Annual progress towards project outcome in the current reporting cycle (2015): In 2015, a number of major scenario-guided policy processes were conducted and/or completed as part of the DFID portfolio of work (see DFID reporting document attached): In Honduras (National Strategy for Climate Change Adaptation in Agriculture), Cambodia (Climate Change Priorities Action Plan), Bangladesh (7th 5 year plan), Tanzania (New Environmental Policy), Uganda (Agricultural Sector Plan), Burkina Faso (National Plan for the Rural Sector), Colombia (Action Plan for the National Agricultural Adaptation Strategy) and Ghana (National Climate Change Policy). Policy makers tested their plans against diverse socio-economic/climate scenarios. Plans in Cambodia, Bangladesh, Honduras are finalized; other countries in 2016.
In addition, several new processes were initiated: Costa Rica's INDC (which was completed as an additional outcome in 2015); Tanzania's Socio-Economic Development plan; Bangladesh's NAP. Another workshop was organized to integrate the Ugandan policy recommendations. Two new policy processes focused on business were initiated in Cambodia. Finally, the Honduras plan was down-scaled to community levels in participatory workshops.

> **Communication and engagement activities have contributed to achieving your Project outcomes:** We have created blogs with all progress – the blog developed on the DFID outcomes has been particularly useful to at once show the value of scenario-guided policy development to those unfamiliar with the approach. Videos have proven very useful – for instance, participants in the Tanzania socio-economic development process signed up in part because of the positive experienced communicated by Tanzania participants in the NEP process. The animated video for the Pacific scenario also created positive feedback.
>
> **Evidence documents of progress towards outcomes:** Scenarios Project DFID outcome case.docx

Annual progress towards outcome (end of 2016): Scenario-guided national policies finalized in 2014 and 2015, will be supported through responding to strategic planning capacity needs of the responsible governments. Policy guidance started in 2015 will be finalized. Collaborations with global partners will continue, and new global collaborations will be set up.

Annual progress towards outcome (end of 2017): Policy engagement in all regions with a greater focus on food security and private sector guidance; strong and measurable implementation of training and capacity building in scenario-guided policy formulation with governments and other actors.

Annual progress towards outcome (end of 2018): <Not defined>

Lessons regarding your Theory of Change and implications for the coming planning cycle; e.g. how have your assumptions changed, or do you have stronger evidence for them: The main difference between scenario-guided policy processes in 2014 and 2015 has been a shift to a more central food systems focus (using Oxford conceptual models) and a focus toward policies and plans where a food systems approach is possible.

4.2 Contribution to CCAFS Outcomes

RP WA - Outcome 2019: National level decision-makers (Gov. ministries), national agricultural research systems, NGOs, civil society organizations, regional organizations use CCAFS science-derived decision support tools and systems to mainstream climate change into national plans and policies from local to national levels.

Indicator #1: FP4 Indicator: # of equitable national/subnational food system policies enacted that take into consideration climate smart practices and strategies

2019	
Target value: 2 policies	**Cumulative target to date:** Cannot be Calculated

2019
Target narrative: The scenario-guided policy development conducted in Ghana, Burkina Faso and Niger in 2014 and 2015, as well as the customized scenario development for ECOWAS priority setting will be expected to have led to at least 2 finalized policies to be reported in 2019.
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.

2015		
Target value: 2 policies	**Cumulative target to date:** Cannot be Calculated	**Target achieved:** 1.0

Target narrative: In 2014, multi-scale, scenario guided policy proposal scenario development by the CCAFS SIA and scenarios teams was conducted with the Ghana national policy platform, followed by a period in which the implementation of policy recommendations was done. In early 2015, in a cross-CRP integration process, scenario-guided policy analysis in Burkina Faso, and likely also in Niger, has been planned.

In parallel, engagement with ECOWAS has been initiated in 2013 and 2014, and through a grant received from UNU, the CCAFS scenarios, developed for the ECOWAS region, will be extended to fit a number of specific ECOWAS policy needs.

Narrative for your achieved targets, including evidence: In West Africa, a new scenario-guided planning process was initiated in Burkina Faso with the government's integrative rural team, the SP-CSPA, to develop the new PNSR – plan for rural sector development. What was exceptional is that it was not only plan development – this was a cross-CRP effort, led by CCAFS but with FTA, WLE and Dryland Systems – where integrated research plans were made to complement government plans – a model for CGIAR in other national contexts. WA scenarios expanded to provide inputs to a UNU project which provides direct recommendations to ECOWAS.

The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>

Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: Gender balance, as well as the representation of vulnerable groups, was always taken into account in workshop process design.

2016	
Target value: 2	**Cumulative target to date:** Cannot be Calculated

Target narrative: Successful policy guidance in Burkina Faso (PNSR) will be built upon, and policy guidance in Ghana (CCP) will continue, both framed by close collaboration with ECOWAS and UNU. Opportunities in Niger will be explored.

2016
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.

2014		
Target value: <Not defined>	**Cumulative target to date:** 0	**Target achieved:** <Not defined>
Target narrative: <Not defined>		
Narrative for your achieved targets, including evidence: <Not defined>

RP EA - Outcome 2019: National Ministries of Agriculture, Environment and parliamentarians are collaborating to make evidence-informed policies for increased investments in climate resilient food systems.

Indicator #1: FP4 Indicator: # of equitable national/subnational food system policies enacted that take into consideration climate smart practices and strategies

2019	
Target value: 2 policies	**Cumulative target to date:** Cannot be Calculated
Target narrative: Through scenario-guided policy development with UNEP WCMC and the IITA FP4 project in 2014 and 2015, two scenario-guided policies will be expected to have been finalized before 2019 in Uganda and Tanzania.	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.	

2015		
Target value: 2 policies	**Cumulative target to date:** Cannot be Calculated	**Target achieved:** 2.0
Target narrative: Through collaborative processes with UNEP WCMC and the IITA FP4 project, in 2014 and 2015, Uganda and Tanzania develop CSA policies based on the EA scenarios in 2015.		

2015

Narrative for your achieved targets, including evidence: In East Africa, scenarios were used to guide o

Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: <Not defined>

RP SEA - Outcome 2019: Policy makers enhancing the design, investment decisions, implementation and monitoring and evaluation of agro - sectoral climate change policies through a transparent, coordinative and consultative mode from local to national level.

Indicator #1: FP4 Indicator: # of equitable national/subnational food system policies enacted that take into consideration climate smart practices and strategies

2019	
Target value: at least 2 national policies	**Cumulative target to date:** Cannot be Calculated
Target narrative: The scenario-guided policy work leading to a policy outcome in Cambodia in 2014 and aiming for policy outcomes in Lao PDR, Vietnam and Myanmar in 2015 should amount to at least 2 national policy outcomes by 2019.	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.	

2015		
Target value: at least 2 national policies	**Cumulative target to date:** Cannot be Calculated	**Target achieved:** 3.0

2015

Target narrative: Cambodia: In 2014,after the SEA scenarios workshop in late 2013, the Cambodian MAFF's CCPAP (147mln USD) was developed in a partnership with the CCAFS scenarios coordinator in Southeast Asia, finalized and signed with implementation starting in 2014. Scenario-guided planning (8 mln USD) is part of the plan. In a scenarios workshop with UNEP WCMC, the implementation of the CCPAP was reviewed with Cambodian and regional stakeholders to bring in non-governmental partners. in 2015, the CCAFS scenarios team will further guide the implementation of the planning components of the CCPAP and will train government partners in scenario-guided planning.
Lao PDR: The UNEP WCMC-funded scenarios workshop reviewed the draft of the Lao socio-economic development plan. A strategy was set up by government and non-government stakeholders to strengthen the CC adaptation and environmental dimensions of the plan and its implementation. In 2015, the CCAFS scenarios team will support the workshop participants in the execution of this strategy to strengthen the socio-economic development plan.
Vietnam: The government and non-government participants in the UNEP WCMC scenarios workshop reviewed the Vietnam agricultural development plan, proposing a strategy to strengthen its climate adaptation, mitigation and environmental impact aspects. In 2015, the CCAFS scenarios team will support this strategy.
Myanmar: A workshop in Myanmar used the SEA scenarios to review the Myanmar adaptation plan draft, and CCAFS SEA/scenarios have been invited to help develop the next draft. Support for this development will be given into 2015.

Narrative for your achieved targets, including evidence: -CCPAP operationalised - CCAFS facilitated interactions between MAFF, MoE and MoC. Funding from ASEAN for food systems futures, with a link to MoC.
-SEA scenarios used to help identify priorities for the Cambodia CBIT (Cambodia Business Initiative for Trading) with MoC and used as part of MoC sub-national planning engagements.
-Scenario session organized with the Cambodia National Assembly, on CSA futures. Results of this process are being taken forward by CNA Working Group 3 with CCAFS support.

MoC support letter:

The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>

Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: Gender balance, as well as the representation of vulnerable groups, was always taken into account in workshop process design – and through sub-national public engagements.

2016

Target value: 2	**Cumulative target to date:** Cannot be Calculated

2016
Target narrative: Policy guidance to be conducted with Cambodia MoC and MAFF on policies and implementation plans; opportunities elsewhere investigated.
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.

2014		
Target value: <Not defined>	**Cumulative target to date:** 0	**Target achieved:** <Not defined>
Target narrative: <Not defined>		
Narrative for your achieved targets, including evidence: <Not defined>		
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>		
Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: <Not defined>		

Indicator #2: FP4 Indicator: # of regional/global organisations and processes that inform their equitable institutional investments in climate smart food systems using CCAFS outputs

2019	
Target value: at least 2 organizations	**Cumulative target to date:** Cannot be Calculated
Target narrative: The CCAFS partnership with WWF to provide recommendations for the ADB Natural Capital investment plan, its work with the ASEAN, de Delta Commission and regional proposals in 2014 and 2015 means that at least 2 regional organizations can be reported to have used scenarios results, methodologies and recommendations in their planning and processes by 2019.	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.	

2015		
Target value: at least 2 organizations	**Cumulative target to date:** Cannot be Calculated	**Target achieved:** 3.0

2015

Target narrative: In 2014, following the UNEP WCMC scenarios workshop inputs were provided by the CCAFS scenarios team to WWF who partnered with the Asian Development Bank on a Natural Capital investment plan - adding recommendations on climate resilience and food security. In 2015, next phases of this plan will be supported by the CCAFS scenarios team. The CCAFS scenarios team has also been working on regional GEF and IFAD proposals in 2014. The Mekong Delta Commission has invited the CCAFS scenarios team to provide scenarios support. Engagement with ASEAN priority setting has happened throughout 2014. These activities will be supported in 2015.

Narrative for your achieved targets, including evidence: •   WWF included investment recommendation to major ADB investments based on the Southeast Asia scenarios in its Natural Capital plan in 2015.
•   A concept note for the use of scenarios for ASEAN CSR has been accepted and the resulting project is being implemented by the Cambodian government with support by CCAFS.
•   With Oxfam Asia, a scenario process on climate adaptation was organized in the Philippines by the CCAFS Asia regional scenarios coordinators, focusing on the Philippines and Bangladesh – the EMBRACE project.

The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>

Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: Gender balance, as well as the representation of vulnerable groups, was always taken into account in workshop process design – and through sub-national public engagements.

2016	
Target value: 2	**Cumulative target to date:** Cannot be Calculated

Target narrative: Collaborations with UNEP WCMC and ASEAN, as well as GIZ and other partners to be built up.

The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.

2014		
Target value: <Not defined>	**Cumulative target to date:** 0	**Target achieved:** <Not defined>

Target narrative: <Not defined>

Narrative for your achieved targets, including evidence: <Not defined>

2014
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>
Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: <Not defined>

RP LAM - Outcome 2019: National governments design and enact equitable food systems policies and strategies taking adaptation into consideration to support national and regional policy and global climate change negotiations. Private institutions develop and support implementation of NAPs and equivalent policies with their respective investment plans addressing climate challenges to increase food security and resilience to changes in climate.

Indicator #1: FP4 Indicator: # of equitable national/subnational food system policies enacted that take into consideration climate smart practices and strategies

2019	
Target value: 3 policies	**Cumulative target to date:** Cannot be Calculated
Target narrative: Policies supported in Honduras, Costa Rica and 1 other country.	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.	

2015		
Target value: 3 policies	**Cumulative target to date:** Cannot be Calculated	**Target achieved:** 3.0

2015

Target narrative: In Honduras in 2014, the Secretariat for Agriculture and Livestock's ACC&GRAC plan for agricultural climate adaptation has been tested in a workshop with the policy writers responsible for the plan and the smallholders who are the targeted beneficiaries, using scenarios to review the feasibility of the plan. The SAG's original draft was thoroughly reviewed and revised using the down-scaled scenarios. The resulting new draft will be used by the government to formulate its final version. Submission of this final version is planned at the end of 2014.

In Peru in November 2014, in a workshop funded by UNEP WCMC, the Colombian government's "Estrategia de adaptación del sector agropecuario a fenómenos climáticos", the Bolivian government's "Plan del Sector Desarrollo Agropecuario", the Peruvian government's plan on risk management in agriculture (PLANGRACC) and Ecuador's agricultural climate adaptation plan were reviewed by national stakeholders, using the CCAFS Andean scenarios which were translated into land use, ES and biodiversity maps by UNEP WCMC. The revisions for the Colombian plan were requested to be used immediately in November for a substantive new draft supported by CCAFS and UNEP WCMC. The revisions for Bolivia concern linking the agricultural development plan with the climate adaptation plan in early 2015 with support from CCAFS. The Peruvian PLANGRACC needs a new official review round to incorporate the additions in 2015; the Ecuadorian plan should be supported to use the participatory implementation framework developed by the participants. In 2015, CCAFS will support all these policy pathways.

In the Trifinio area (Honduras, El Salvador, Guatemala), a regional policy guidance workshop was organized with the World Resources Institute in September 2014. The results from this workshop took the shape of a number of policy priorities at the regional level, the implementation of these actions will be facilitated by the project's partners in 2015.

Narrative for your achieved targets, including evidence: Honduras ENACCSAH developed using scenarios. Subsequently, the plan was down-scaled into district-level plans by community farmer and indigenous stakeholders with CCAFS.

RP SAs - Outcome 2019: National and sub-national governments develop climate-smart agriculture policies and strengthen related institutions based on evidences from case studies, data, tools, and models

Indicator #1: FP4 Indicator: # of equitable national/subnational food system policies enacted that take into consideration climate smart practices and strategies

2019	
Target value: 2 policies	**Cumulative target to date:** Cannot be Calculated
Target narrative: By 2019, policy development work on the 7th 5 year plan of Bangladesh, the Bangladesh NAP and a major policy in Sri Lanka will have led to at least 2 policies finalized by 2019.	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.	

2015		
Target value: 2 Policies	**Cumulative target to date:** Cannot be Calculated	**Target achieved:** 2.0
Target narrative: In 2014, the CCAFS scenarios team worked with the Bangladesh Planning Commission to develop content for the draft of the Bangladesh 7th 5 year plan guided by the South Asia scenarios, together with ICCCAD. Following a workshop, the CCAFS scenarios team engaged in the development on the plan's concept notes related to CCAFS topics. In addition, the CCAFs scenarios team was invited to help develop the Bangladesh government's capacity for the development of the NAP. In Pakistan, a similar process with the Planning Commission was proposed by LEAD Pakistan and a concept note has been submitted. In 2015, close collaboration with the Bangladesh government on the 7th 5 year plan (finalization date June 2015) and the NAP will continue, as well the setting up of a similar process with the Pakistan government.		
Narrative for your achieved targets, including evidence: • The Bangladesh 7th 5 Year Plan was developed using scenarios, focusing on contributions on CCAFS key areas, as well as broader resilience aspects. The 7th FYP was finalized in September 2015. http://youtu.be/7wvjqvfWOLI • Letter from Dr. Shamshul Alam, Member, GED, Planning Commision: https://www.dropbox.com/s/jsib11qii30j3yx/Letter%20from%20Member%20GED.jpg?dl=0 • F i n a l p l a n (f o c u s c h a p t e r 8) : https://www.dropbox.com/s/4i014kv0rvrei8m/CHAPTER%208%20Bangladesh%207th%20FYP.docx?dl=0 • CCAFS has been coordinating scenarios for Bangladesh NAP – CCAFS scenarios review event by Aminul Islam (UNDP) • New agricultural policy process with think tank Verite in Sri Lanka. • With Oxfam Asia and CCAFS scenarios on the Philippines and Bangladesh – the EMBRACE project. - http://imeloxfam.blogspot.nl/2016/01/testing-theory-of-change-against_6.html https://www.dropbox.com/s/4unzpbkty3e2f3e/Documentation%20of%20Scenario%20Planning%20exercise%20between%20CCAFS%20%26%20Oxfam%20PHL.docx?dl=0		

2015
The expected annual gender and social inclusion contribution to this CCAFS Outcome: <Not defined>
Narrative for your achieved annual gender and social inclusion contribution to this CCAFS outcome: Gender balance, as well as the representation of vulnerable groups, was always taken into account in workshop process design.

2016	
Target value: 2	**Cumulative target to date:** Cannot be Calculated
Target narrative: Bangladesh NAP development guided; Bangladesh 7th 5YP tracked; major policy in Sri Lanka to be followed.	
The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.

FP4 - Outcome 2019: Appropriately directed institutional investment of regional/global organisations and processes (e.g. IFAD, WB, FAO, UNFCCC) based on national/regional engagement to learn about local climate smart food system priorities

Indicator #1: FP4 Indicator: # of regional/global organisations and processes that inform their equitable institutional investments in climate smart food systems using CCAFS outputs

2019	
Target value: at least 5 global organizations	**Cumulative target to date:** Cannot be Calculated

2019

Target narrative: FAO, IFAD, UNEP WCMC, Oxfam GB, WRI, WWF, the OECD and CARIAA have partnered with or funded the CCAFS scenarios team on scenario development processes and processes to use scenarios for policy guidance at regional and global levels. CCAFS scenario methodology, scenario results and partnerships with governments have been leveraged for these activities and the staff of these global organizations has learned scenario planning methods and incorporated them in their organizational processes.

The expected annual gender and social inclusion contribution to this CCAFS Outcome: All scenario processes in this project are designed to allow for greater participation by vulnerable groups in policy formulation.

2015		
Target value: 4 global organizations	**Cumulative target to date:** Cannot be Calculated	**Target achieved:** 7.0

Target narrative: FAO, IFAD, UNEP WCMC, Oxfam GB, WRI, WWF, the OECD and CARIAA have partnered with or funded the CCAFS scenarios team on scenario development processes and processes to use scenarios for policy guidance at regional and global levels. CCAFS scenario methodology, scenario results and partnerships with governments have been leveraged for these activities.

Narrative for your achieved targets, including evidence: •   Oxford University CCAFS authored UNEP GEO6 assessment's scenarios for Africa/IPBES
•   WWF used SEA scenario recs for ADB invvestment http://www.adb.org/sites/default/files/publication/176534/investing-natural-capital-gms.pdf
•   SPC was leader/owner of a CCAFS-facilitated scenario-process for pacific

4.4 Outcome case studies

Outcome case study #1
Title: DFID outcome case: scenario-guided policy development in 7 countries
Outcome statement: As part of DIFD portfolio, CCAFS has helped formulate a range of agriculture, climate and development policies and plans in Honduras (National Strategy for Climate Change Adaptation in Agriculture), Cambodia (Climate Change Priorities Action Plan), Bangladesh (7th 5 year plan), Tanzania (New Environmental Policy), Uganda (Agricultural Sector Plan), Burkina Faso (National Plan for the Rural Sector), Colombia (Action Plan for the National Agricultural Adaptation Strategy) and Ghana (National Climate Change Policy). Policy makers tested their plans against diverse socio-economic/climate scenarios.

5. Project outputs

5.1 Overview by MOGs

Major Output groups - 2019
FP4 - MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues **Brief bullet points of your expected annual 2019 contribution towards the selected MOG** <Not defined> **Brief plan of the gender and social inclusion dimension of the expected annual output** <Not defined>
FP4 - MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios **Brief bullet points of your expected annual 2019 contribution towards the selected MOG** <Not defined> **Brief plan of the gender and social inclusion dimension of the expected annual output** <Not defined>

Major Output groups - 2014
FP4 - MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues **Brief bullet points of your expected annual 2014 contribution towards the selected MOG** <Not defined> **Brief summary of your actual 2014 contribution towards the selected MOG:** <Not defined> **Brief plan of the gender and social inclusion dimension of the expected annual output** <Not defined> **Summary of the gender and social inclusion dimension of the 2014 outputs:** <Not defined>

FP4 - MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios

Brief bullet points of your expected annual 2014 contribution towards the selected MOG
<Not defined>

Brief summary of your actual 2014 contribution towards the selected MOG:
<Not defined>

Brief plan of the gender and social inclusion dimension of the expected annual output
<Not defined>

Summary of the gender and social inclusion dimension of the 2014 outputs:
<Not defined>

Major Output groups - 2015

FP4 - MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Brief bullet points of your expected annual 2015 contribution towards the selected MOG
<Not defined>

Brief summary of your actual 2015 contribution towards the selected MOG:
In 2015, a number of major scenario-guided policy processes were conducted and/or completed as part of the DFID portfolio of work (see DFID reporting document); In addition, Costa Rica's INDC; Tanzania's Socio-Economic Development plan; Bangladesh's NAP. . Two new policy processes focused on business were initiated in Cambodia.

Brief plan of the gender and social inclusion dimension of the expected annual output
<Not defined>

Summary of the gender and social inclusion dimension of the 2015 outputs:
Gender balance, as well as the representation of vulnerable groups, was always taken into account in workshop   process   design.

FP4 - MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios

Brief bullet points of your expected annual 2015 contribution towards the selected MOG
<Not defined>

Brief summary of your actual 2015 contribution towards the selected MOG:
Oxford University CCAFS researchers were among the authors of the UNEP GEO6; •   WWF used SEA scenario for ADB investment; SPC owner of Pacific scenarios; collaboration with UNDP in Bangladesh NAP; CSA 101 contribution; UNFCCC SBSTA; Major DFID outcome case.

Brief plan of the gender and social inclusion dimension of the expected annual output
<Not defined>

Summary of the gender and social inclusion dimension of the 2015 outputs:
Gender balance, as well as the representation of vulnerable groups, was always taken into account in workshop process design.

Major Output groups - 2016

FP4 - MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Brief bullet points of your expected annual 2016 contribution towards the selected MOG
Scenario-guided policy design/formulation conducted and supported in at least 10 countries at the national policy level.

Brief plan of the gender and social inclusion dimension of the expected annual output
Scenario processes are always designed for social inclusion in policy making by vulnerable groups.

FP4 - MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios

Brief bullet points of your expected annual 2016 contribution towards the selected MOG
The project works with at least 5 major global organizations on investment and priority setting.

Brief plan of the gender and social inclusion dimension of the expected annual output
Scenario processes are always designed for social inclusion in policy making by vulnerable groups.

Lessons regarding your major outputs groups (MOGs) and possible implications for the coming planning cycle: Increasing focus on food systems, private sector.

5.2 Deliverables

Deliverable #1

Main Information
Title: 2 Publications on the 2 LAM scenarios processes and policy processes in high-impact journals
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Peer reviewed Publications	**Sub Type:** Peer-reviewed journal articles
Year of expected completion: 2016	
Status: <Not defined>	

Next-user
Science community in LAM and around science-policy links
Knowledge, attitude, skills and practice changes expected in next-user: Knowledge about key strategic issues for CSA and food systems in Andes and Central America; knowledge about effective policy-oriented scenario planning (combining scenarios and back-casting methods).
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: A blog story around each paper; making the papers open access, sharing widely on networks (Oxford, CCAFS, IIASA, UCI, etc.)

Partners contributing to this deliverable
Partner #1 (Responsible): Vervoort, Joost <joost.vervoort@eci.ox.ac.ukk>, University of Oxford - University of Oxford

Deliverable #2

Main Information	
Title: 2 policy briefs on LAM policy guidance processes	
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues	
Main Type: Communication Products and Multimedia	**Sub Type:** Articles for media or news
Year of expected completion: 2015	
Status: Complete	

Next-user
Policy makers (in multiple ministries and sectors, including NGOs, private, donors) in target countries as well as broader LAM region
Knowledge, attitude, skills and practice changes expected in next-user: An easy access to the key insights from the 2 LAM scenarios processes and their policy impacts; interest in using scenarios methodology and outputs for policy guidance; links to more in-depth information.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blogs supporting the policy briefs; wide dispersal through LAM networks and through networks of partner organizations; supported by videos on LAM scenarios processes that have been created in 2014. Responses to policy briefs will be tracked and documented.

Deliverable #3

Main Information
Title: 6 blogs: 2 to accompany policy briefs; 2 to accompany research papers; 2 tool/methods guide

MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Communication Products and Multimedia	**Sub Type:** Articles for media or news

Year of expected completion: 2015

Status: Complete

Next-user

Decision makers in CSA-relevant sectors; researchers

Knowledge, attitude, skills and practice changes expected in next-user: Easy access to understanding of how policy guidance can be done using scenarios, and key insights from the regional scenarios. Links to more in-depth results and information on the processes.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: These blogs are linked to policy briefs and research papers; videos produced in 2014 will be linked as well. Wide dispersal through policy and science networks.

Deliverable #4

Main Information

Title: Regionally contextualised/translated version of OLDFAR (working title) scenario development tool

MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Tools and Computer Software	**Sub Type:** Tools
Year of expected completion: 2016	
Status: On-going	**Justification for cancelling the deliverable:** Core translation of OLDFAR MATLAB code to C++ has been completed. Currently finalizing user portal.

Next-user
Users seeking to develop scenarios in governments, private sector, academia and civil society

Knowledge, attitude, skills and practice changes expected in next-user: An ability to identify key future drivers of change for a given project scope and use them to generate diverse, multi-driver scenarios; a greater understanding of how drivers of change interact to create different futures. Access to examples of use of the tool in LAM.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: A blog and guide accompanying the tool, potentially a step-by-step video; wide dispersal among regional networks (UCI, CCAFS, IICA) as well as global networks (OXFORD, CCAFS, IIASA, FAO etc.)

Deliverable #5

Main Information
Title: A regionally contextualized/translated scenario development and use methodology guide
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Reports, Reference Materials and Other Papers	Sub Type: Reference material

Year of expected completion: 2015
Status: Complete

Next-user
Planners and researchers in governments, civil society, academia, private sector in LAM countries
Knowledge, attitude, skills and practice changes expected in next-user: A comprehensive understanding of how to develop scenarios and how they can be used to test and develop plans, policies and investments. l.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: A blog accompanying the guide; a methods video; wide dissemination across regional networks.Support from the scenarios team to help with questions and decisions around the use of scenarios in LAM; invitation to report back on use and suggest improvements to the guide materia

Deliverable #6

Main Information	
Title: Journal article on global scenarios synthesis	
MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios	
Main Type: Peer reviewed Publications	**Sub Type:** Peer-reviewed journal articles
Year of expected completion: 2016	
Status: Extended	**Justification for cancelling the deliverable:** Delay because of illness in partner team. Paper has been outlined, to be finalized in 2016.

Next-user
Researchers, global organizations and scenarios partners (FAO, UNEP WCMC, CARIAA, WRI, IFAD, OECD, OXFAM)

Knowledge, attitude, skills and practice changes expected in next-user: An understanding of key uncertainties for cc and afs across the global tropics; common trends across scenarios and insights into the use of scenario methodology. An understanding of how different CCAFS regions are connected.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Associated policy brief and blog; wide dissemination through multi-sector networks (Oxford, CCAFS, IIASA, global partners).

Deliverable #7

Main Information

Title: National climate, agriculture and socio-economic development policies and plans based on scenarios across six regions

MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios

Main Type: Communication Products and Multimedia	**Sub Type:** Articles for media or news

Year of expected completion: 2015

Status: Complete

Next-user

Global organizations; national policy makers; partner organizations (FAO, UNEP WCMC, CARIAA, IFAD, WRI, OECD, OXFAM)

Knowledge, attitude, skills and practice changes expected in next-user: An understanding of key uncertainties for cc and afs across the global tropics; common trends across scenarios and insights into the use of scenario methodology. Easy access to the research paper on this topic.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: This will be accompanied by a blog; easy links to the underlying research; we will disseminate this widely through CCAFS and partner networks (see next user).

Deliverable #8

Main Information	
Title: Training guide scenarios methodology and online materials	
MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios	
Main Type: Reports, Reference Materials and Other Papers	**Sub Type:** Reference material
Year of expected completion: 2016	
Status: Extended	**Justification for cancelling the deliverable:** Core methods materials have been completed - document to be finalized in early 2016

Next-user
Researchers, planners across sectors, global partners of the CCAFS scenarios project
Knowledge, attitude, skills and practice changes expected in next-user: Understanding of how to develop and use scenarios from start to finish, including policy impact through backcasting and similar methods and several variations of the approach.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blog, wide dissemination through networks (CCAFS, Oxford, IIASA, other partners, regional networks), oxviding links to associated research papers. Providing support and answers to questions to partners and users.

Deliverable #9

Main Information
Title: Tool for developing scenarios through driver analysis (working title OLDFAR)

MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios	
Main Type: Tools and Computer Software	**Sub Type:** Tools
Year of expected completion: 2015	
Status: Cancelled	**Justification for cancelling the deliverable:** This is the same deliverable as the other OLDFAR deliverable - not clear why it is in here twice.

Next-user

Researchers; planners

Knowledge, attitude, skills and practice changes expected in next-user: Ability to explore a wide range of drivers of change and combine them into diverse scenarios. This tool is the basis for the CCAFS scenarios development method as used in SA, SEA and LAM - partners will be able to use it themselves in future processes.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blog, instruction video, guidance materials; wide dissemination through CCAFS and partner networks; the scenarios team will provide support to users with questions.

Deliverable #10

Main Information

Title: Working paper on global foresight for AR4D

MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios

Main Type: Reports, Reference Materials and Other Papers	**Sub Type:** Research report
Year of expected completion: 2015	
Status: Cancelled	**Justification for cancelling the deliverable:** Members of the writing team left CGIAR positions.

Next-user

Global AR4D institutions: CGIAR, USAID, FAO, etc, academic institutions in global north and south

Knowledge, attitude, skills and practice changes expected in next-user: An understanding of the key drivers facing researchers in AR4D into the medium-term future (up to 2030) to guide priority setting and capacity development in the above organizations.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Consultations with next users will play a key role in the process to ensure it is appropriate for decision-making in their organizations. Post-process support will be offered to key users by the scenarios team.

Deliverable #11

Main Information	
Title: Policy brief on global partnerships and multi-regional collaborations	
MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios	
Main Type: Communication Products and Multimedia	**Sub Type:** Articles for media or news
Year of expected completion: 2015	

Status: Cancelled	**Justification for cancelling the deliverable:** replaced by SBSTA and CSA 101 contributions

Next-user

Global organizations, including scenarios partners, CCAFS partners and prospective partners

Knowledge, attitude, skills and practice changes expected in next-user: Users can understand the utility of scenarios methods through partnership examples that show policy impacts in multiple regions and at the organizational level.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: The policy brief will be co-developed with partners and disseminated through their networks. It will be accompanied by a blog that will be posted on partner websites.

Deliverable #12

Main Information

Title: 5 blogs accompanying 2015 global scenarios deliverables	
MOG # 4: Improved regional/global investment choices through appropriately contextualised priority setting, drawing on global foresight and socio-economic regional scenarios	
Main Type: Communication Products and Multimedia	**Sub Type:** Social media outputs
Year of expected completion: 2015	
Status: Cancelled	**Justification for cancelling the deliverable:** This duplicates other deliverables. Not clear why it is here.

Next-user
Researchers, planners, policy makers
Knowledge, attitude, skills and practice changes expected in next-user: Accessible understanding of various products mentioned above, with easy access to the source documents.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blogs will be shared and sometimes co-developed with partners; partner networks will be leveraged for dissemination.

Deliverable #14

Main Information
Title: 2 policy briefs on SEA policy guidance processes
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Communication Products and Multimedia	Sub Type: Articles for media or news

Year of expected completion: 2015
Status: Complete

Next-user
Decision makers in multiple sectors in Southeast Asia, both in specific case study countries and in the wider region
Knowledge, attitude, skills and practice changes expected in next-user: An easy access to the key insights from the SEA scenarios process and their policy impacts; interest in using scenarios methodology and outputs for policy guidance; the ability to find resources to learn from policy impact case studies and replicate them.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blogs supporting the policy briefs; wide dispersal through SEA networks; supported by videos on SEA scenarios processes that have been created in 2014. Responses to policy briefs will be tracked and documented.

Deliverable #15

Main Information	
Title: 4 blogs for Southeast Asia	
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues	
Main Type: Communication Products and Multimedia	**Sub Type:** Social media outputs
Year of expected completion: 2015	
Status: Complete	

Next-user
Decision makers in CSA-relevant sectors; researchers
Knowledge, attitude, skills and practice changes expected in next-user: Easy access to understanding of how policy guidance can be done using scenarios, and key insights from the regional scenarios. Easy access to more in-depth materials about the Southeast Asia scenarios process and its applications.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: These blogs are linked to policy briefs and research papers; videos produced in 2014 will be linked as well. Wide dispersal through policy and science networks, both in Southeast Asia and through global networks.

Deliverable #16

Main Information
Title: 2 Publications on the SA scenarios process and policy processes in high-impact journals
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Peer reviewed Publications	**Sub Type:** Peer-reviewed journal articles
Year of expected completion: 2016	
Status: Extended	**Justification for cancelling the deliverable:** papers both being finalized. Delay because of illness in partner team

Next-user
Science community in South Asia, globally including partner organizations
Knowledge, attitude, skills and practice changes expected in next-user: Knowledge about key strategic issues for CSA and food systems in SA; knowledge about effective policy-oriented scenario planning - including insight into scenario development and the use of scenarios to guide specific policies.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: A blog story around each paper; making the papers open access, sharing widely on networks in South Asia and through partners such as ICCCAD, LEAD Pakistan, PANOS etc. as well as global partners.

Deliverable #17

Main Information	
Title: 2 policy briefs on SA policy guidance processes	
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues	
Main Type: Communication Products and Multimedia	**Sub Type:** Articles for media or news
Year of expected completion: 2016	
Status: Extended	**Justification for cancelling the deliverable:** Some delay because of lack of comms officer. In the meantime, SA case study reported in this global synthesis policy brief: https://ccafs.cgiar.org/publications/national-climate-agriculture-and-socio-economic-development-policies-and-plans#.VtgINJwrKM9

Next-user
Policy makers in the case study countries and in SA more generally, in multiple sectors
Knowledge, attitude, skills and practice changes expected in next-user: An easy access to the key insights from the SA scenarios process and their policy impacts; interest in using scenarios methodology and outputs for policy guidance - with access to in-depth focus on the specific case studies.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blogs supporting the policy briefs; wide dispersal through SA networks (support by PANOS); supported by videos on SA scenarios processes that have been created in 2014. Responses to policy briefs will be tracked and documented.

Deliverable #20

Main Information

Title: 2 policy briefs on EA policy guidance processes

MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Communication Products and Multimedia	**Sub Type:** Articles for media or news

Year of expected completion: 2016

Status: Extended	**Justification for cancelling the deliverable:** Policy processes still on-going - briefs to be developed by PACCA.

Next-user

Policy makers in EA countries (including private sector, NGOs, donors) at the national and regional levels.

Knowledge, attitude, skills and practice changes expected in next-user: An easy access to the key insights from the EA scenarios process and their specific policy impacts; interest in using scenarios methodology and outputs for policy guidance.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blogs supporting the policy briefs; wide dispersal through EA networks; supported by videos on EA scenarios processes that have been created in 2014. Responses to policy briefs will be tracked and documented.

Deliverable #21

Main Information	
Title: 2 Publications on the WA scenarios process and policy processes in high-impact journals	
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues	
Main Type: Peer reviewed Publications	**Sub Type:** Peer-reviewed journal articles
Year of expected completion: 2016	
Status: Extended	**Justification for cancelling the deliverable:** Papers being finalized in 2016 - some delay because of partners.

Next-user
Science community in West Africa and globally, including global partners (scenarios and CCAFS more generally)
Knowledge, attitude, skills and practice changes expected in next-user: Knowledge about key strategic issues for CSA and food systems in WA; knowledge about effective policy-oriented scenario planning. This will include insights into scenario development in the region as well as the use of scenarios in policy development in multiple countries.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: A blog story around each paper; making the papers open access, sharing widely on networks in West Africa, with partners and global networks.

Deliverable #22

Main Information
Title: 2 policy briefs on WA policy guidance processes
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Communication Products and Multimedia	**Sub Type:** Articles for media or news
Year of expected completion: 2016	
Status: Extended	**Justification for cancelling the deliverable:** Policy processes in progress.

Next-user

Policy makers in the case study countries, in WA more generally, ECOWAS and global partners and donors

Knowledge, attitude, skills and practice changes expected in next-user: An easy access to the key insights from the WA scenarios process and their policy impacts; interest in using scenarios methodology and outputs for policy guidance - including access to more in-depth information about scenario use methods and impact pathways in West Africa.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Blogs supporting the policy briefs; wide dispersal through WA networks; supported by videos on WA scenarios processes that have been created in 2014. Responses to policy briefs will be tracked and documented - specific engagement with ECOWAS on the replication of these approaches across the WA region.

Deliverable #24

Main Information
Title: 2 Workshops with IITA FP4 in Tanzania and Uganda
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Workshops	**Sub Type:** Workshop

Year of expected completion: 2015	
Status: Complete	

Next-user

Decision makers in ministries of environment, ag and planning in Uganda and Tanzania

Knowledge, attitude, skills and practice changes expected in next-user: Revised policies will be developed together with decision-makers in Tanzania and Uganda. This process will increase the robustness of the policies; and in addition will train decision-makers in scenario-guided policy development.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Methodology guides, expert facilitation on concrete scenario methodology and policy review/development, post-workshop guidance and collaboration on policy implementation.

Deliverable #25

Main Information

Title: Workshops with Pakistan and Bangladesh planning commissions
MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Workshops	Sub Type: Workshop
Year of expected completion: 2016	

Status: Extended	**Justification for cancelling the deliverable:** Workshop in Bangladesh held and reported as separate deliverable; Workshop in Pakistan now moved to Sri Lanka.

Next-user
Decision makers in planning commissions in Pakistan and Bangladesh
Knowledge, attitude, skills and practice changes expected in next-user: In each country, workshops will be organized to further develop (Bangladesh) or initiate (Pakistan) the revision of drafts of policy plans for development.
Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Expert facilitation will be provided by the scenario team from Oxford as well as support from ICCCAD and LEAD Pakistan, continuous engagement with policy makers will be organized (on a monthly basis in Bangladesh with ICCCAD); post-meeting collaboration to finalize policies will be guided by CCAFS scenarios team and partners.

Partners contributing to this deliverable

Deliverable #26

Main Information

Title: 2 Workshops in Burkina Faso and Niger

MOG # 1: Improved national planning processes through policy analyses, (re)formulation and implementation; and stakeholder analyses and engagement through scenarios, learning alliances and science-policy dialogues

Main Type: Workshops	**Sub Type:** Workshop

Year of expected completion: 2016

Status: Extended	**Justification for cancelling the deliverable:** Workshop in Burkina Faso has been held; Workshop in Niger now moved to Ghana 2016.

Next-user

Decision makers (particularly those involved in policy writing as well as priority setting) in Burkina Faso and Niger around CSA

Knowledge, attitude, skills and practice changes expected in next-user: Decision makers from Burkina Faso and Niger will test and develop new versions of CSA policies for each country, guided by scenarios that they will have downscaled for their specific country and policy contexts from the WA scenarios.

Strategies (facilitation, engagement, knowledge sharing etc.) will be used to encourage and enable next-user to utilize deliverables and adopt changes: Expert facilitation by CCAFS scenarios team and WA team, both leading up to the workshop, during the workshop and after the workshop; intense collaboration to choose policies for development; co-development of policies and continuous engagement after meetings to finalize policies, supported by CCAFS scenarios and WA teams.

5.3 Summary on next-users

Next user #1
Key next user for the current reporting period. Key game changers. Observed Knowledge, Attitude, Skills and practice changes: Our key next users were policy makers across a number of countries and sectors; private sector actors; civil society actors; researchers, both at regional, national and sub-national levels. Decision-makers in these sectors were game changers because they were directly responsible for the policies that were tested using scenarios, and could therefore both implement the recommendations, as well as allow for other stakeholders to come into these processes. Ethnographic research during scenario processes has characterized them as social learning processes that facilitated systemic thinking. Other behavior changes were an increased interest in involving other stakeholders in planning processes, and an increased use in general of scenario-guided planning processes, as well as an interest to learn more about these methods.
Strategies (facilitation, engagement, knowledge sharing etc.) you used to encourage and enable this next user to utilize deliverables and adopt changes: We used closely collaborative scenario-guided policy development processes with our next users. This ESG working paper outlines the basics of our approach:
Reported deliverables serve as evidence towards this achieved change: Examples of this achieved change can be found in our DFID outcome case. Longer version (with all relevant links) https://www.dropbox.com/s/aok0983oyfe64r3/Scenarios%20Project%20DFID%20outcome%20case.docx?dl=0   Published (shorter) version: https://ccafs.cgiar.org/publications/national-climate-agriculture-and-socio-economic-development-policies-and-plans#.VtgINJwrKM9   As well as in this ESG working paper: http://www.earthsystemgovernance.org/canberra2015/wp-content/uploads/2015/11/Vervoort.pdf
Lessons and implications for the next planning cycle: Based on next-user requests for more internal capacity development around scenario methods, Phase 2 work focuses on such capacity development; and our efforts to raise bilateral funding also have this focus.

5.4 Project highlights

Project highlight Information #1	
Title: Scenario-guided INDC development for Costa Rica	
Author: Marieke Veeger	**Subject:** Scenario-guided policy development
Publisher: CCAFS	**Year:** 2015
Project highlights types Participatory action research Successful communications Gender and social inclusion Innovative non-research partnerships Inter-center collaboration Policy engagement Capacity enhancement Breakthrough science Food security	**Start date:** 2015-01-01
End date: 2015-12-31	**Is global:** No
Country: Costa Rica	**Keywords:** Scenario-guided policy development; inclusive planning; INDC; mitigation

Highlight description: In 2015, Costa Rica was planning for a change of paradigm to reduce greenhouse gas emissions. Data used to define an INDC were not able to show a radical decrease in emissions; model projections were only able to slow them down. MINAE´s INDC team used the CCAFS scenario methodology in a process led by the CCAFS Scenarios Project (UCI and the University of Oxford, under the banners of CCAFS LAM and FP4) to start a dialogue amongst national experts, define robust mitigation measures and create a long term national vision on emission reduction. 10 of the 23 mitigation measures of the INDC originated in the scenario workshop.

Introduction / Objectives: Pascal Girot, coordinator of Costa Rica´s INDC team, participated in the 2013 scenario workshop organized by the CCAFS Scenarios Project (UCI and the University of Oxford) with CCAFS Latin America, in which regional scenarios for Central America were created. He identified the methodology as useful to create the INDC. UCI motivated the INDC team to create a document with current government proposals to reduce emissions. The INDC team saw the scenario methodology as a great way for strategic explorations and definition of the INDC, especially because other (quantitative) sources of information did not stimulate strategic thinking.

Results: In a 2 day scenario workshop, 30 national experts reviewed and added suggestions to this document. The new and improved measures were tested for resilience in 4 future scenarios of Costa Rica, downscaled from the CCAFS scenarios for Central America and adjusted to Costa Rica and INDC relevant issues. Experts formulated recommendations of improvement and identified which were the most and least robust measures. For each following sector workshop, MINAE used a report with recommendations that resulted from the scenario workshop to start a dialogue. This led to a final summary report of recommendations for the final INDC document. 10 of the 23 mitigation measures of the INDC originated in the scenario workshop. The development of Costa Rica´s INDC, including the motives for and main results of the CCAFS scenario methodology, is described in the following document, soon to be published by MINAE´s Climate Change Unit on their website: ¨Estudio de Caso: El Proceso de Elaboración de la Contribución Nacional (INDC) de Costa Rica¨.

Partners: Pascal Girot (coordinator INDC team); Minister of Environment Edgar Gutiérrez; 5 consultants of INDC team including World Bank; 373 representatives of public/private sector that used the scenario tested list of robust measures to initiate dialogue in sector workshops; Ministries of Agriculture and Environment, all other Ministries involved in the INDC process.

Start date: 2015-01-01	**End date:** 2015-12-31

Is global: No

Country: Uganda Tanzania Ghana Burkina Faso Honduras Cambodia Bangladesh	**Keywords:** Scenario-guided policy development; inclusive planning; food systems

Highlight description: The CCAFS Scenarios project, led by the University of Oxford, has developed socio-economic and climate scenarios as a tool for strategic policy planning and investment decisions. Through workshops and close collaborations with policy makers, the team has facilitated the adaptation and use of these scenarios, which help next-users establish more robust plans, policies and strategies and provide "no-regrets" options in the face of diverse futures. The outcomes of 7 such processes were included as part of the 2015 CCAFS portfolio of work for DFID.

Introduction / Objectives: Scenarios can be a powerful approach to exploring future climate and socio-economic uncertainties. However, scenarios are not strategies – instead, they provide challenging contexts for decision-making. In the face of pressing policy concerns around climate adaptation and mitigation, the need to integrate scenarios with governance and planning processes is high, and greater understanding is needed about how such links could be made effective. We present a multi-regional CCAFS research project that evaluates the use of governance scenarios for policy development in the context of climate adaptation, socio-economic development and food security through seven case studies.

Results: CCAFS has helped formulate a range of agriculture, climate and development policies and plans in Honduras (National Strategy for Climate Change Adaptation in Agriculture), Cambodia (Climate Change Priorities Action Plan), Bangladesh (7th 5 year plan), Tanzania (New Environmental Policy), Uganda (Agricultural Sector Plan), Burkina Faso (National Plan for the Rural Sector), Colombia (Action Plan for the National Agricultural Adaptation Strategy) and Ghana (National Climate Change Policy). Policy makers tested their plans against diverse socio-economic/climate scenarios.

The CCAFS scenarios team first developed regional scenarios with diverse stakeholders, quantified these using IMPACT (IFPRI) and GLOBIOM (IIASA), then worked closely with governments to co-design a timely process around a policy or plan, creating down-scaled and policy-specific scenarios with national stakeholders and analysing plan drafts from the perspective of each scenario. Recommendations were integrated to create more robust plans.

Keys to the success of the CCAFS scenario project has been a focus on specific policies, plans and questions; openness and adaptability of the scenario method; and ensuring strong process ownership by decision-makers.

Partners: MAFF: Cambodia Ministry of Agriculture, Forestry and Fisheries: responsible for CCPAP development
MoC: Cambodia Ministry of Commerce: Support to CCPAP development
MoE: Cambodia Ministry of Environment: Support to CCPAP development
SAG: Honduras Secretariat for Agriculture and Livestock: responsible for ENACCSAH development
GED: Bangladesh Global Economics Division, Planning Commission: responsible for 7th FYP development
ICCCAD: International Centre for Climate Change and Development: co-convener, link to GED
UNDP Bangladesh: NAP organizer
VPO: Vice President's Office, Tanzania: Responsible for NEP development
MAAF: Uganda Ministry of Agriculture, Animal Industry and Fisheries: responsible for Agricultural Sector Plan development
SP-CSPA: Burkina Faso Permanent Secretariat for the Coordination of Agricultural Sector Policies: responsible for PNSR development
MADR: Colombia Ministry of Agriculture and Rural Development: responsible for APAAS development
MESTI: Ghana Ministry of Environment, Science, Technology and Innovation: responsible for NCCP development
UCI: University of International Cooperation, Costa Rica: implementing and outreach partner for Latin America
Oxfam GB: funders of outreach project on links between climate extremes, governance and food security, including climate scenarios.

Project highlight Information #1

Title: Scenario-guided review of the Plan National du Secteur Rural (PNSR) of Burkina Faso in synergy with multi-CRP research support

Author: Lucas Rutting	**Subject:** Scenario-guided policy development; CRP integration
Publisher: CCAFS	**Year:** 2015
Project highlights types Participatory action research Successful communications Gender and social inclusion Innovative non-research partnerships Inter-center collaboration Policy engagement Capacity enhancement Breakthrough science Food security	**Start date:** 2015-01-01
End date: 2015-12-31	**Is global:** No
Country: Burkina Faso	**Keywords:** Scenario-guided policy development; inclusive planning; CRP integration; harmonizing research and policy objectives

Highlight description: In Burkina Faso, several CGIAR centres (CIFOR, ICRAF, ICRISAT, IWMI and ILRI) implement research under the following CRPs: CCAFS, FTA, WLE and Dryland Systems. Since 2013, these CRPs undertook a joint initiative to tackle the twin challenges to more effectively coordinate their interventions in Burkina Faso and to demonstrate the contribution of their research to the development goals set by the Government of Burkina Faso for the rural sector. Thus, a partnership concept was developed to serve as a planning, monitoring and learning tool of this initiative and in addition, a common vision, a mission and a roadmap have been defined for this initiative extended to non-CGIAR research and development actors.

As a part of this initiative, a project was started focusing on the revision of the National Rural Sector Program, or Programme National du Secteur Rurale (PNSR) in French, of which the formulation and implementation is led by the SP/CPSA (Secrétariat Permanent de Coordination des Politiques Sectorielles Agricoles). To this end, a workshop was organized in July 2015 in Ouagadougou, Burkina Faso, aimed at examining the policy in the context of multiple socio-economic and climate scenarios (developed by CCAFS for West African contexts), to improve the policy's robustness, flexibility and feasibility in the face of these diverse futures. In addition, the joint initiative of the CRPs FTA, CCAFS, WLE and Dryland was linked to this process: workshop participants identified how CGIAR research can contribute to strengthening the PNSR. This scenario-guided policy development process is unique as it brings together CGIAR experts and national policy making experts, and links policy formulation directly to research.

Introduction / Objectives: Project objectives: 1) Identify the issues addressed in the PNSR; 2) Formulate key objectives of the PNSR (for both 5 and 10 years); 3) Identify contribution of CGIAR research to PNSR objectives; 4) Downscale the CCAFS West Africa scenarios to the level of Burkina Faso; 5) Review the PNSR in the context of the Burkina Faso scenarios; 6) Improve the PNSR and first draft on basis of the scenario-guided review; and 7) Improve contribution of CGIAR research on basis of the scenario-guided review. Participants included policy makers, researchers, academics, rural private sector and civil society.

Results: The results of the meeting were 1) an analysis and revision of the PNSR; 2) tailored socio-economic/climate scenarios for Burkina Faso; 3) an introduction to scenarios methodology for strategic planning for all participants, and 4) tailored CGIAR research proposals to contribute to PNSR objectives. Currently, three teams of consultants have completed the independent evaluation process of the PNSR. Their reports have been validated by the coordination committee of the revision of the PNSR. A synthesis report is currently being produced which will be reviewed by the interministerial technical committee (ITC) of the PNSR in April 2016. The ICT will develop broad guidelines on basis of this. The PNSR revision process is aligned with the formulation of the new overarching development plan for Burkina Faso, the SCADD. CCAFS is highly involved in the process during these follow-up steps.

Partners: SP/CSPA - Secrétariat Permanent de Coordination des Politiques Sectorielles Agricoles

Project highlight Information #1	
Title: Global Future Earth transformative scenarios project: Seeds of Good Anthropocenes.	
Author: Joost Vervoort	**Subject:** transformative scenarios; Future Earth
Publisher: CCAFS	**Year:** 2015
Project highlights types Participatory action research Successful communications Gender and social inclusion Innovative non-research partnerships Inter-center collaboration Policy engagement Capacity enhancement Breakthrough science Food security	**Start date:** 2016-01-04
End date: 2016-12-31	**Is global:** Yes
Country:	**Keywords:** Transformative scenarios; Future Earth; Upscaling

Highlight description: The goal of the Future Earth funded 'Bright Spots - Seeds of a Good Anthropocene' project is to stimulate visionary thinking and action about what a "good Anthropocene" could look like. The notion of the Anthropocene reflects the unprecedented impacts that humans are having on the planet since the mid-20th century – impacts that are expected to increase, effectively ending the relatively stable Holocene period and creating an uncertain, unpredictable future in which human and natural systems are highly intertwined, leading to fundamentally new challenges for the human race.

Introduction / Objectives: The project aims to counterbalance current dystopic visions of the future that may be inhibiting our ability to move towards a positive future for the Earth and humanity. We do this by soliciting, exploring, and developing a suite of alternative, plausible "Good Anthropocenes" – positive visions of futures that are socially and ecologically desirable, just, and sustainable. "Good Anthropocene" futures will be composed of many elements already in existence, which we call "seeds", which could combine in unique and surprising ways to create an almost unimaginable future.

Results: The seeds of alternative good futures already occur in many places around the world. Identifying where these elements of a Good Anthropocene currently exist on the planet, and understanding how and why they occur, can help us envision how people might help these seeds grow into new, positive futures for the Earth and humanity. It is essential that we gather seeds from a diversity of disciplines, worldviews, values, and regions, even if we cannot hope to be represent all the great initiatives out there. Seeds are being solicited specifically from different communities of research and practice around the world, and more openly through this blog platform. The outputs of our project include a database of seeds for analysis, a story-telling blog, scenarios and games, as well as academic and popular articles. Around 300 seed initiatives have already been collected as part of the database. A number of transformative scenario games and sessions have been implemented by Oxford and CST partners.

Partners: Future Earth, Mcgill University, Stockholm Resilience Centre at Stockholm University, Centre for Complex Systems in Transition (Stellenbosch), University of Oxford.

6. Activities

Activity #1
Title: Scenario-guided policy development and testing in Latin America
Description: Regional scenarios have been developed and quantified. Successful scenario-guided policy development has been conducted with major policies in Honduras and Costa Rica, other processes like Colombia have taken longer. CCAFS continues to support policy development in LAM using scenarios, and building capacity with partners and next users.

Start date (dd-MM-yyyy): 01-09-2013	**End date (dd-MM-yyyy):** 31-12-2016
Leader: Veeger, Marieke <mveeger@uci.ac.cr>, UCI - Universidad para la Cooperación Internacional	
Status: On-going	**Justification:** A number of outcomes - Honduras ENACSSAH developed; Costa Rica INDC developed; down-scaling with ACICAFOC; community scenarios with SAG; project development with ILSI.

Activity #2
Title: Global synthesis and scenarios, training and methodological support to global and regional organizations
Description: • A number of regional and global organizations have shown interest in the use of CCAFS scenarios outputs and/or methodologies for their scenario-guided planning, priority setting and stakeholder engagement. These organizations include FAO, UNEP WCMC, WWF, IFAD, OECD, WRI, CARIAA and Oxfam GB at the global level, as well as several FAO regional offices, ECOWAS, COMESA, ADB and ASEAN. • In 2016 the CCAFS scenarios project will explore options and funding for a training program for policy staff across sectors • A synthesis of the scenarios results across all regions will be written up as a high-impact journal article and policy brief in 2016.

Start date (dd-MM-yyyy): 01-01-2013	**End date (dd-MM-yyyy):** 31-12-2016
Leader: Vervoort, Joost <joost.vervoort@eci.ox.ac.ukk>, University of Oxford - University of Oxford	
Status: Extended	**Justification:** Interest by global partners has continued - WWF, ADB, WB, UNFCCC, UNEP, Oxfam, others have collaborated with CCAFS Scenarios Project.

Activity #3
Title: Scenario-guided policy development and testing in Southeast Asia
Description: Successful scenario guidance for policy development has been conducted with the Cambodian MAFF, as well as with the Cambodian MoC. In addition, collaborations have been conducted with ASEAN affiliates and global partners such as UNEP WCMC. Work in Cambodia and other SEA countries   on   policy   guidance   continues   in   2016.

Start date (dd-MM-yyyy): 01-11-2013	End date (dd-MM-yyyy): 31-12-2016
Leader: Peou, Rathana <rathana.pvdh@gmail.com>, IRRI - International Rice Research Institute	
Status: On-going	**Justification:** Major progress on outcomes: operationalizing CCPAP; CCCA-mediated EU funding with MAFF; coordination between MAFF, MoE and MoC; ASEAN CSR; process with Cambodia National Assembly; work with Oxfam Asia; WWF/ADB; private sector.

Activity #4	
Title: Scenario-guided policy development and testing in South Asia	
Description: The Bangladesh 7th 5 year plan has been developed using CCAFS scenarios. Now, the focus is on the Bangladesh NAP and policy work in Sri Lanka (2016).	
Start date (dd-MM-yyyy): 01-08-2014	**End date (dd-MM-yyyy):** 31-12-2016
Leader: Muzammil, Maliha <maliha.muzammil@ouce.ox.ac.uk>, University of Oxford - University of Oxford	
Status: On-going	**Justification:** Major progress on outcomes: Bangladesh 7th FYP finalized; work started in NAP development; Sri Lanka ag policy with Verite; Oxfam Bangladesh project.

Activity #5	
Title: Scenario-guided policy development and testing in West Africa	
Description: In 2014, scenarios developed for West Africa were used in Ghana by the CCAFS scenarios and SIA teams to review and develop multi-level policy proposals with the national policy platform. In 2015, national policy guidance, supported by ECOWAS,hav been conducted in Burkina Faso with a multi-CRP team. Resulting methods and scenario contents will be communicated to ECOWAS for its priority setting and for out-scaling scenarios methods across WA - specific funding has been received from UNU to extend the CCAFS scenarios for ECOWAS needs. In 2016, these activities will be expanded, with a focus on Burkina Faso, Ghana and possibly Niger.	
Start date (dd-MM-yyyy): 01-03-2014	**End date (dd-MM-yyyy):** 31-12-2016
Leader: Vervoort, Joost <joost.vervoort@eci.ox.ac.ukk>, University of Oxford - University of Oxford	
Status: On-going	**Justification:** Major progress on outcomes - unique multi-CRP policy and research development for Burkina Faso PNSR; UNU scenarios for ECOWAS needs.

Activity #6
Title: Scenario-guided policy development and testing in East Africa

Description: In 2014, the CCAFS East Africa scenarios were developed further in partnership with UNEP WCMC and the university of Kassel into land use change, ecosystem services and biodiversity maps. These scenarios were used to develop policy proposals in Uganda, Rwanda and Burundi with national policy makers. In 2015, the implementation of these policy proposals will be guided by CCAFS scenarios and UNEP WCMC together with ARCOS and SID. The EA scenarios have been used by the IITA FP4 program in 2015 in two scenario-guided policy planning workshops in Uganda and Tanzania. In 2016, this work continues, along with additional policy work with UNEP WCMC.

Start date (dd-MM-yyyy): 01-06-2014	**End date (dd-MM-yyyy):** 31-12-2016
Leader: Vervoort, Joost <joost.vervoort@eci.ox.ac.ukk>, University of Oxford - University of Oxford	

Status: On-going	**Justification:** Major progress on outcomes: Tanzania NEP reviewed and developed using scenarios; Uganda ASSR reviewed and developed using scenarios; Collaboration with WB and IIASA in Ethiopia; new policy guidance in Tanzania on 2nd Development plan.

Lessons regarding your project activities and possible implications for the coming planning cycle: More focus on food systems, private sector in this cycle.

7. Leverages

Leverage #1	
Title: ASEAN-CSR project	
Partner name: ASEAN - Association of South East Asian Nations - Cambodia
