

## Public Private Partnerships for veterinary service delivery in Kenya

**Project Title:** P616 - Activity 2.4.1: Animal Health Service provision

**Description of the innovation:** The objective of this approach was to reduce the unit cost of services, which is high in extensive livestock systems. It was a partnership between the government and the private sector. When the government goes for vaccination campaigns they just vaccinate against one or at most two diseases. The private sector can provide additional services (treatments, deworming, tick control, vaccines) at the same time and share some costs with the government.

**New Innovation:** No

**Stage of innovation:** Stage 2: successful piloting (PIL - end of piloting phase)

**Innovation type:** Production systems and Management practices

**Geographic Scope:** National

**Number of individual improved lines/varieties:** <Not Applicable>

**Country(ies):**

- Kenya

**Description of Stage reached:** Pilot successfully implemented in one country. Pilot of the model in other countries planned.

**Name of lead organization/entity to take innovation to this stage:** ILRI - International Livestock Research Institute

**Names of top five contributing organizations/entities to this stage:**

- County Government of Marsabit (Kenya)
- FACTS - Farmers Agrisystems Capacity and Technology Solutions
- County Government of Garissa (Kenya)
- Sidai - Sidai Africa Limited
- Technoserve
- County Government of Isiolo (Kenya)

**Milestones:** No milestones associated

**Sub-IDs:**

**Contributing Centers/PPA partners:**
