

Aflasafe BF01 product for Burkina Faso and potentially 10 other countries in the Sahel

Project Title: P342 - Technological and institutional innovations for assessing and mitigating food safety risks related to aflatoxins designed and tested, including capacity building

Description of the innovation: Biocontrol approach to preventing aflatoxin from growing in crops like maize and groundnuts

New Innovation: No

Stage of innovation: Stage 4: uptake by next user (USE)

Innovation type: Production systems and Management practices

Geographic Scope: National

Number of individual improved lines/varieties: <Not Applicable>

Country(ies):

- Burkina Faso

Outcome Impact Case Report: <Not Defined>

Description of Stage reached: Aflasafe BF01 a biocontrol product developed for use in maize and groundnut in Burkina Faso, was approved by the regulatory authority CSP-CILSS. Now the product is available for commercial use. The product is commercialized by the company Elephant Vert

Name of lead organization/entity to take innovation to this stage: IITA - International Institute of Tropical Agriculture

Names of top five contributing organizations/entities to this stage:

- INERA - Institut de l'Environnement et de Recherches Agricoles (Burkina Faso)

Milestones: No milestones associated

Sub-IDOs:

Contributing Centers/PPA partners:
