

## Intercropping with green manure cover crops (GMCC)

**Project Title:** P1771 - Zimbabwe Agricultural Livelihoods Innovation Project/CRS-ZALIP

**Description of the innovation:** We tried Intercropping with green manure cover crops-GMCC inter cropping strategies with 7 different legume combinations in maize-based systems. These have been successful in Murehwa District

**New Innovation:** No

**Stage of innovation:** Stage 1: discovery/proof of concept (PC - end of research phase)

**Innovation type:** Production systems and Management practices

**Geographic Scope:** National

**Number of individual improved lines/varieties:** <Not Applicable>

**Country(ies):**

- Zimbabwe

**Description of Stage reached:** So far we have tried them in clustered research trials on-farm and have extended them to 1000 baby trials

**Name of lead organization/entity to take innovation to this stage:** <Not Defined>

**Names of top five contributing organizations/entities to this stage:**

- CRS - Catholic Relief Services

**Milestones:** No milestones associated

**Sub-IDs:**

**Contributing Centers/PPA partners:**

**Evidence link:**

- <https://tinyurl.com/yytswmpx>

**Deliverables associated:** <Not Defined>

**Contributing CRPs/Platforms:**

- Maize - Maize
