Study #511

Contributing Projects:

- P268 - Flagship 1: Engagement, synthesis and support

Part I: Public communications

Type: Other MELIA activity

Status: Completed

Year: 2019

Title: Midline surveys at household, village and organizational levels in Ghana Climate Smart Village

Commissioning Study: CCAFS

Part II: CGIAR system level reporting

Links to the Strategic Results Framework:

Sub-IDOs:

- Enhanced capacity to deal with climatic risks and extremes (Mitigation and adaptation achieved)
- Increased resilience of agro-ecosystems and communities, especially those including smallholders

Is this OICR linked to some SRF 2022/2030 target?: Yes

SRF 2022/2030 targets: <Not Defined>

Description of activity / study: This is a pilot test of conducting a midline survey using the same tools/instruments as used in the baseline. It was done to assess whether doing it in more sites would be useful. The survey results will be used to examine what kinds of changes are happening in the CSV site (beyond CCAFS's activities) to look at development trends, natural resource trends, etc. that are being experienced by the communities and households.

Geographic scope:

- Sub-national

Country(ies):

- Ghana

Comments: Conducted in the CSV of Lawra-Jirapa
