Study #3840

Contributing Projects:

- P1599 - Catalyzing farmer innovations and the adoption of promising management and technological options to facilitate the development of low-carbon cattle value chains in Latin America

Part I: Public communications

Type: Synthesis (secondary) study

Status: Completed

Year: 2020

Title: COVID-19 and the bovine livestock sector in Colombia: Current and potential developments, impacts and mitigation options

Commissioning Study: CIAT, CRP Livestock, CRP CCAFS, UKRI-BBSRC

Part II: CGIAR system level reporting

Links to the Strategic Results Framework:

Sub-IDOs:

- Reduced market barriers
- Increased livelihood opportunities
- Conducive environment for managing shocks and vulnerability, as evidenced in rapid response mechanisms

Is this OICR linked to some SRF 2022/2030 target?: Too early to say

Description of activity / study: The COVID-19 crisis is affecting the bovine livestock sector in Colombia. First impacts and short-term mitigation measures are already visible in all links of the beef and dairy value chains. This document serves as a guide to understand current developments, impacts and mitigation measures related to the COVID-19 pandemic. It also provides an outlook on potential future impacts and suggestions for mitigation options that can help policy and decision-makers in preparing the sector better for future crises

Geographic scope:

- National

Country(ies):

- Colombia
