

## Evidences

### Study #3895

#### Contributing Projects:

- P265 - [Flagship Leader] FP2: Engagement, synthesis and support
- P268 - Flagship 1: Engagement, synthesis and support

#### Part I: Public communications

**Type:** Program/project evaluation/review

**Status:** Completed

**Year:** 2020

**Title:** Understanding CCAFS' influence in motivating actors to tackle climate change

**Commissioning Study:** FP2

#### Part II: CGIAR system level reporting

#### Links to the Strategic Results Framework:

Sub-IDOs:

- Enabled environment for climate resilience
- Conducive agricultural policy environment
- Conducive environment for managing shocks and vulnerability, as evidenced in rapid response mechanisms

Is this OICR linked to some SRF 2022/2030 target?: No

Description of activity / study: This evaluation sought to understand CCAFS' influence in motivating actors to tackle climate change. A conceptual framework was developed, and an innovative approach based on the Digital Methods epistemology was employed to explore the dynamics of knowledge dissemination and changes in attitude towards CSA among stakeholders at various levels. It considered online networks and narratives as evidence of "offline" program influence. Results show that CCAFS has inspired positive change in government policy; built a global community for climate adaption; and sparked public interest in "Climate Smart Agriculture"

#### Geographic scope:

- Global
