EXTRA MILK!

SAME COST- MORE MILK

EXTRA! 500 LITRES OF MILK

THE COMMON WAY

After calving, I buy my cow 10 bags of dairy meal and continue with good forage.

I feed my cow 2 kg (1.5 Kasuku tins) of dairy meal daily for ten months.

During the first three months we get about 11 bottles (8 kg) of milk per day.

In the next seven months we get about 9 bottles (6 kg) per day.

We got 2000 kg of milk from our cow this year.

We should have chosen the BETTER WAY.

THE BETTER WAY

After calving, I buy my cow 10 bags of dairy meal and continue with good forage.

I feed my cow 8 kg (6 Kasuku tins) of dairy meal daily for the first three months.

During the first three months we get about 20 bottles (15 kg) of milk per day.

In the next seven months we feed forage only and get about 8 bottles (5.5 kg) per day.

We got 2500 kg of milk from our cow this year.

I’m glad we chose the BETTER WAY and got more milk and MONEY.
