

CIAT's new E-Newsletter

August 2008

CIAT's new quarterly e-newsletter "Challenges & Innovations" was launched last 12 August in replacement of its previous bulletin, CIAT-News, and distributed to a vast audience of over 36,000 subscribers, including researchers, donors, NARS, and stakeholders of different countries.

This e-newsletter, also published in Spanish, aims to become one of the Center's main communication channels to disseminate the advances and impact of its research in the tropics.

Challenges & Innovations has two main sections: one contains stories highlighting CIAT's research and the other, news items on the Center's diverse activities.

If you know of others that would be interested in receiving future issues of our e-newsletter, please send their contact information to ciatnews-admin@cgiar.org. Your comments and suggestions are most welcome.
