**Subject:** RE: [Consortium Legal] Re: CO comments re 2014 IA Report Part 1

Dear Elise,

Attached please find two documents to include with our previous IA submission. They address two of the green items:

1. **[For Section 4 re Open Access.] Open Access info for IFPRI publications and external IFPRI-authored publications, and datasets.** Please note we have long had an institutional repository, all IFPRI publications are OA, and we offer fully accessible IFPRI datasets on Dataverse.
2. **[Regarding IA dissemination strategies and achievements.] The annual report of the Communications and Knowledge Management division (CKM).** This document outlines all of the communications/disseminations activities CKM undertook in 2014 to further the reach of IFPRI research—but please note this does not cover dissemination activities undertaken specifically by our research divisions, or by the two CRPs we lead (A4NH and PIM)—each of those entities has a communications staff member who undertakes division- or CRP-specific communications activities. CKM is responsible for all institutional-level communications/dissemination. Naturally, a lot of the communications/dissemination work we do is directly related to research generated by or through specific divisions/programs/CRPs.
3. We did not have time to send in suggested info on partners/donors.

For 2015 reporting (in 2016), can we receive the template very far in advance, with all the mandatory new aspects mentioned in bullets in the email, so we can prepare properly? The new “asks” will require a huge amount of work.

Thanks,  
Gwendolyn
