Ten Facts About the CGIAR in 2005

- The Consultative Group on International Agricultural Research (CGIAR) is a strategic alliance of countries, international and regional organizations, and private foundations supporting 15 international agricultural research Centers that work with national agricultural research systems, civil society organizations and the private sector.

- Among the 64 CGIAR Members, 25 are industrialized countries, 22 are developing countries, 13 are international and regional organizations, and 4 are private foundations.

- Thirteen of the 15 CGIAR Centers are located in developing countries.

- By 2005, the CGIAR had trained over 75,000 scientists and researchers from developing countries.

- CGIAR financial resources increased from US$337 million in 2001 to $450 million in 2005, and its Membership increased from 58 to 64 Members in the same period.

- In 2005, the CGIAR Alliance employed over 8,500 scientists and technical staff in over 100 countries. The 10 countries providing the most CGIAR research staff were, in alphabetical order, Australia, Colombia, France, India, Japan, Nigeria, Peru, Syria, United Kingdom and United States.

- In 2005, all 15 CGIAR Centers had boards whose membership numbers balanced representation from the South and the North.

- A recent study of the CGIAR System showed that approximately 19 percent of CGIAR scientists completed a PhD between 2001 and 2005.

- In 2005, women occupied 27 percent of CGIAR managerial positions.

- In 2005, the average number of papers published in peer-reviewed publications per scientist was 2.1. Around 45 percent of all scientific papers published in refereed journals and in conference and workshop proceedings were co-authored by developing country partners.
