RESEARCH PROGRAM ON Water, Land and Ecosystems

CGIAR

# Evidences

## Study #1511

**Contributing Projects:**

- P492 - Innovation Lab for Small Irrigation Project (ILSSI) and Evaluation of the Relationship Between Sustainably Intensified Production Systems and Nutritional Outcomes (SIPS-IN), plus a small irrigation studies

### Part I: Public communications

**Type:** EPIA: Ex-post Impact Assessment

**Status:** Extended

**Year:** 2018

**Title:** Small-scale irrigation interventions (ILSSI)

**Commissioning Study:** The ILSSI project assesses the impact of small-scale irrigation on women's empowerment and nutrition. A first paper on irrigation-nutrition impacts has been published, but we are putting out 3 more papers on this topic. The first paper is not sufficient.

### Part II: CGIAR system level reporting

**Links to the Strategic Results Framework:**

Sub-IDOs:

- Improved capacity of women and young people to participate in decision-making
- Optimized consumption of diverse nutrient-rich foods

Is this OICR linked to some SRF 2022/2030 target?: Yes

SRF 2022/2030 targets:

- # of more people, of which 50% are women, meeting minimum dietary energy requirements
- # of people, of which 50% are women, assisted to exit poverty

Description of activity / study: We will write this up once we have a body of 3-4 journal articles.

**Geographic scope:**

- Multi-national

Country(ies):

- Tanzania, United Republic
- Ethiopia
- Ghana
