

Electronic syndromic surveillance of livestock diseases in Marsabit, Kenya

Project Title: P608 - Activity 2.2.2: Establish protocols for survey of antimicrobial use and for monitoring AMR

Description of the innovation: Expanded electronic surveillance (e-surveillance) system for livestock diseases in the county, which will now be rolled out by the county government

New Innovation: No

Stage of innovation: Stage 3: available/ ready for uptake (AV)

Innovation type: Biophysical Research

Geographic Scope: Sub-national

Number of individual improved lines/varieties: <Not Applicable>

Country(ies):

- Kenya

Description of Stage reached: An eSurveillance system was implemented in Marsabit, Kenya including collection of information on drug use. It will now be rolled out by the county government.

Name of lead organization/entity to take innovation to this stage: ILRI - International Livestock Research Institute

Names of top five contributing organizations/entities to this stage:

- The University of Sydney

Milestones: No milestones associated

Sub-IDs:

Contributing Centers/PPA partners:

Evidence link:

- <https://hdl.handle.net/10568/98837>

Deliverables associated: <Not Defined>

Contributing CRPs/Platforms:

- A4NH - Agriculture for Nutrition and Health
- Livestock - Livestock
