

STAR 50A 3/4/1993

CONTENTS

FOREWORD	vii
1. SUMMARY	1
2. INTRODUCTION	3
3. THE RESEARCH SETTING	9
4. DECISIONMAKING WITHIN THE HOUSEHOLD	26
5. CHANGING PATTERNS OF RICE PRODUCTION AND CONTROL	41
6. THE CHANGING ORGANIZATION OF UPLAND FARMING AND INTRAHOUSEHOLD RESOURCE CONTROL	67
7. CONCLUSIONS	88
APPENDIX 1: DETAILS OF SAMPLE VILLAGES	93
APPENDIX 2: DETAILS OF SAMPLE COMPOUNDS	97
BIBLIOGRAPHY	102

TABLES

1.	Percentage of land area cultivated for major crops during the wet season of 1985	11
2.	Objectives and desires of three decisionmaking groups	34
3.	Objectives and desires reported by ethnicity	38
4.	Rice land area belonging to sample compounds in three sample villages during three preproject time periods and during 1986 (hectares)	46
5.	Rice area available, used, and devoted to <i>maruo</i> production, by level of rice production technology in 1981 and from 1983 to 1986	48
6.	The division of plots between <i>maruo</i> and <i>kamangyango</i> , by level of rice production technology for 1984 and 1985	49
7.	Responsibility for deciding the demarcation of rice land between <i>maruo</i> and <i>kamangyango</i> and controlling activities in the field before 1981 and in 1985/86	50
8.	Mean labor inputs in rice production, by sex (all compound members) and by rice production technology level for 1985 and 1986	53
9.	Numbers of women responsible for <i>kamangyango</i> rice stores in the wet seasons of 1981 and 1985	54
10.	Responses to the question: "Was permission required from husband or compound head to sell rice before the project started?"	55
11.	Storage responsibility for <i>maruo</i> rice in 1981 and 1985	56
12.	Responsibility for deciding how many cups of <i>maruo</i> rice to be used for cooking each day	56
13.	Responsibility for taking rice out of the <i>maruo</i> store on a daily basis	56

14.	Responsibility for deciding on the amount of <i>maruo</i> rice to be sold in bulk after harvest	57
15.	Responsibility for deciding if <i>maruo</i> rice is to be sold by the cup later in the season	57
16.	Mean income per compound and per capita adult equivalent, by compounds selling rice versus compounds not selling rice	58
17.	Responsibility for decisionmaking and cash provision in the sphere of food purchases in 1981 and during 1985/86	60
18.	Responsibility for decisionmaking and cash provision in the sphere of farm implement purchases in 1981 and during 1985/86	61
19.	Distribution of decisionmaking authority with respect to the organization of social events	62
20.	Responsibility for the provision of cash for social events	62
21.	Access to project land and income by compound reporting positive change, no change, or negative change in the participation of women in decisionmaking and household spending	66
22.	Crops grown on first <i>kamangyango</i> fields by a subsample of 131 farmers, by sex and by village location	68
23.	Source of help received by girls on their first <i>kamangyangos</i>	68
24.	Changes in cultivated area and the number of female cultivators of rice and groundnut <i>kamangyangos</i> from 1981 to 1986	69
25.	Percentage of total labor inputs to each crop type, by sex	70
26.	Principal concerns in upland <i>maruo</i> crop selection for 1985 and 1986, by sample village	73
27.	Labor inputs to all <i>maruo</i> crops, by sex and by compound group	75
28.	Per capita labor inputs to agriculture, by sex, crop category, and compound group	77

29.	Distribution of hired labor between crop types, by compound group	78
30.	Hired labor to <i>kamangyango</i> fields, by sex of giver and of recipient	79
31.	Labor exchanges between the sexes to <i>kamangyango</i> plots	80
32.	A matrix of labor exchanged between decisionmaker groups ...	81
33.	Labor inputs to each crop type, by decisionmaker group	82
34.	Mean per capita labor inputs to household agriculture, by decisionmaker and by compound group	83
35.	Mean taxation indices for men and women, by compound group	84
36.	Ethnic and historical characteristics of the sample villages	93
37.	Services and infrastructure of the sample villages	94
38.	Health infrastructure of the sample villages	95
39.	Nonfarm employment, credit, and investment in the sample villages	96
40.	Ethnic, historical, and population characteristics of the sample compounds	97
41.	Education and religion in the sample compounds	98
42.	Medical history, health, and hygiene in the sample compounds	99
43.	Areas cultivated during the 1985 wet season by the sample compounds, by crop	100
44.	Sample compound farm income for 1985 and sources of nonfarm income	101

ILLUSTRATIONS

1.	Distribution of major ethno-linguistic groups in Senegambia and the wider region	6
2.	Location map of The Gambia with a study area inset	10
3.	A model of land use economics for upland and lowland villages in The Gambia	15
4.	Models of compound subdivisions	22
5.	Model of compound authority structures: minimal type	31
6.	Model of compound authority structures: expanded type	31
7.	A conceptualization of the key authority figures involved in decisionmaking at each major step of the household food chain	40
8.	Three theoretical scenarios of change associated with the Jahally-Pacharr project	43
9.	Time spent by men and women in each category of household farm labor during the wet season of 1985 (days per capita)	72
