

*Better lives and a better planet
through livestock*

Launch of ILRI Report: Eating wild animals – rewards, risks, and recommendations

Delia Grace
Professor Food Safety Systems, Natural Resources Institute
Joint Appointed Scientist, International Livestock Research Institute

8th World One Health Congress – Cape Town, South Africa
21 September 2024

Eating wild animals: rewards, risks and recommendations

Delia Grace, Bernard Bett, Elizabeth Cook, Steven Lam, Susan MacMillan, Phyllis Masudi, Manon Mispiratceguy, Ha Thi Thanh Nguyen, Hung Nguyen-Viet, Ekta Patel, Annabel Slater, Steve Staal and Lian Thomas

Importance of wild meat

Regional, spatial and cultural drivers

Wild meat as a risk

Spillover events due to wild meat consumption

Intensive farming for meat an unacceptable risk

Current approaches are not sufficient or sustainable

Demand for meat in Africa is growing rapidly

The shortfall is increasingly met by livestock meat imports

Wild meat: new approaches

The 3-legged stool approach

Acknowledgements

Protecting Human
Health Through a One
Health Approach

Remarks:

Dr. Shashi Ramrajh,
Department of Agriculture South Africa (retired),
Report Reviewer
