

# Asian Chicken Genetic Gains (AsCGG)

## Vietnam 2<sup>nd</sup> National Innovation Platform Convening

### Project update

Ngo Thi Kim Cuc  
*National Institute of Animal Sciences*

*Ha Noi, 23 February 2022*

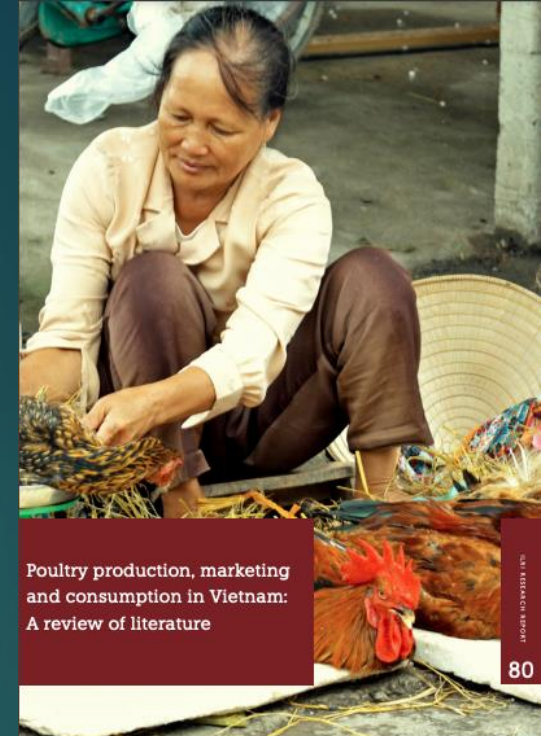

# PROJECT ACHIEVEMENTS IN 2021

## ► *Activity 1: Literature review*

- Poultry production, marketing and consumption in Vietnam: A review of literature was published on <https://hdl.handle.net/10568/115985>

## ► *Activity 2: Baseline surveys*

- Six enumerators were trained on baseline data collection using ODK tool
- Three baseline surveys were conducted with 361 collected questionnaires in Hoa Binh (124), Quang Binh (114) and Ha Nam (123)
- The questionnaires are being inspected and submitted to the ILRI ODK server

# PROJECT ACHIEVEMENTS IN 2021 (CONT)

- ▶ **Activity 3: Confirming and characterising promising indigenous breeds in Vietnam**
  - A report on confirming and characterising three promising indigenous chicken breeds is submitted to ILRI for publishing
- ▶ **Activity 9: Establishing and nurturing the National Innovation Platform**
  - The first National IP convening on poultry value chain was hybrid organised in September 2021 with 41 participants
  - A report on the first national Innovation platform Convening and Project launch was issued

# PROJECT ACHIEVEMENTS IN 2021 (CONT)

- ▶ **Activity 10: Establishing and nurturing community innovation platforms**
  - The first Community Innovation Platform convenings on small-scale chicken value chain were organised in Quang Binh and Ha Nam in 12/2021 with 28 and 31 participants respectively
  - Two report on the establishment and development of community innovation platforms in Ha Nam and Quang Binh were finalised

# PLAN FOR 2022

- *Activity 2:* Analysing survey data and completing a report on current smallholder chicken value chains in the three ecological zones
- *Activity 4:* Negotiating and accessing foreign farmer-preferred chicken breed sources, and importing eggs to Vietnam
