

State Nutrition Profile: Puducherry

ABOUT THIS DATA NOTE

This *Data Note* describes the trends for a set of key nutrition and health outcomes, determinants, and coverage of interventions. The findings are based on data from multiple rounds of the National Family Health Surveys using estimates from reports, factsheets, or unit level data. In addition to standard prevalence-based analyses, this *Data Note* includes headcount-based analyses aligned to the POSHAN Abhiyaan monitoring framework to provide evidence that helps identify priority districts and the number of districts where public health concerns exist as per the WHO guidelines¹. This *Data Note* also includes a color-coded dashboard to compare the coverage of nutrition interventions by district. It concludes with key takeaways for children, women, and men, and identifies areas for improvement.

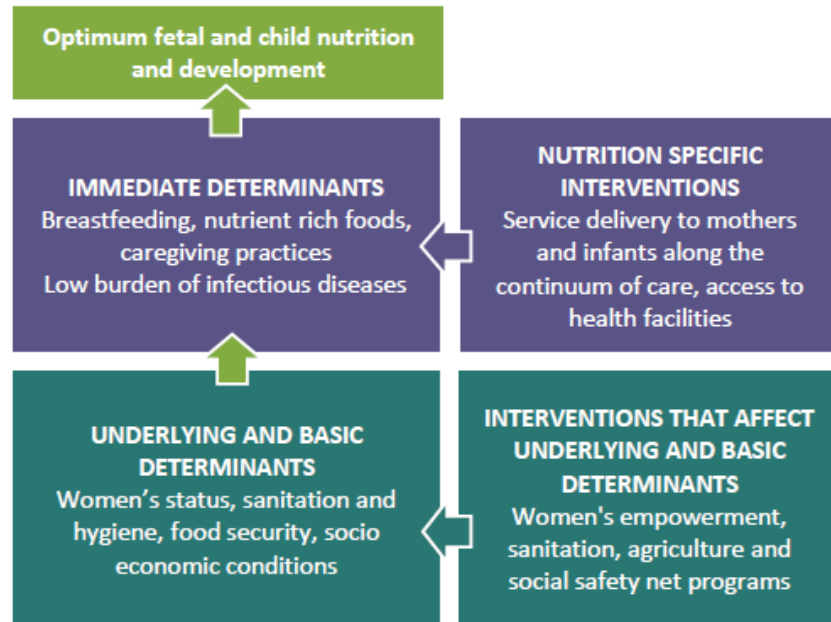

Figure 1. Trends in undernutrition outcomes 2015-2016, 2019-2021

Source: NFHS-4 (2015-2016) national report, and NFHS-5 (2019-2021) national and state factsheets.

Note: As Puducherry is a Union Territory, NFHS-3 (2005-06) data is not available.

¹WHO. Nutrition Landscape Information System (NLiS). Help Topic: Malnutrition in children. Stunting, wasting, overweight, and underweight. (<https://apps.who.int/nutrition/landscape/help.aspx?menu=0&helpid=391&lang=EN>).

²In NFHS-4 and NFHS-5, 0.6% and 0.7% of data were missing, respectively.

Map 1 & 2. Number of stunted & anemic children <5y, 2019-2021

Map 1. Stunting

Number of stunted children¹ = 22,445

Note: Number in '000s in the above figure

Highest burden districts

1	Puducherry	14,454
2	Karaikal	4,846
3	Mahe	1,869
4	Yanam	1,276

No. of districts with public health concern²: 3 of 4

Map 2. Anemia

Number of anemic children¹ = 65,010

Note: Number in '000s in the above figure

Highest burden districts

1	Puducherry	50,726
2	Karaikal	11,178
3	Yanam	1,821
4	Mahe	1,285

No. of districts with public health concern²: 2 of 4

Map 3 & 4. Number of wasted children <5y, 2019-2021

Map 3. Wasting

Number of wasted children¹ = 13,719

Note: Number in '000s in the above figure

Highest burden districts

1	Puducherry	9,894
2	Karaikal	2,909
3	Yanam	634
4	Mahe	282

No. of districts with public health concern²: 3 of 4

Map 4. Severe Wasting

Number of severely wasted children¹ = 4,160

Note: Number in '000s in the above figure

Highest burden districts

1	Puducherry	3,179
2	Karaikal	713
3	Yanam	221
4	Mahe	47

No. of districts with public health concern²: 3 of 4

Source: IFPRI estimates - The headcount was calculated as the product of the undernutrition prevalence, and the total eligible projected population for each district in 2019. Prevalence estimates were obtained from NFHS-5 (2019-2021; all child data), and projected population for 2019 was estimated using Census 2011.

¹The total number of children <5 years is 113,225. The total number of districts is four. ²Public health concern is defined as $\geq 20\%$ for stunting, $\geq 40\%$ for anemia, $\geq 10\%$ for wasting, and $\geq 2\%$ for severe wasting (WHO 2011).

Map 5 & 6. Number of underweight children (<5y) & women (15-49y), 2019-2021

Map 5. Underweight children

Number of underweight children¹ = 17,125

1 Yanam

Note: Number in '000s in the above figure

Highest burden districts

1	Puducherry	11,156
2	Karaikal	3,751
3	Mahe	1,265
4	Yanam	953

No. of districts with public health concern²: 1 of 4

Map 6. Underweight women

Number of underweight women¹ = 41,374

2 Yanam

Note: Number in '000s in the above figure

Highest burden districts

1	Puducherry	29,163
2	Karaikal	9,413
3	Yanam	1,790
4	Mahe	1,008

No. of districts with public health concern²: 1 of 4

Map 7 & 8. Number of anemic women (15-49y), 2019-2021

Map 7. Anemia among non-pregnant women

Number of non-pregnant anemic women¹ = 262,622

5 Yanam

Note: Number in '000s in the above figure

Highest burden district

1	Puducherry	207,274
2	Karaikal	39,919
3	Yanam	9,172
4	Mahe	6,257

No. of districts with public health concern²: 3 of 4

Map 8. Anemia among pregnant women³

Number of pregnant anemic women¹ = 4,168

Yanam

Note: Number in '000s in the above figure

Highest burden districts

1	Karaikal	3,980
2	Mahe	188

No. of districts with public health concern²: 1 of 4

Source: IFPRI estimates - The headcount was calculated as the product of the undernutrition prevalence and the total eligible projected population for each district in 2019. Prevalence estimates were obtained from NFHS-5 (2019-2021); all child/woman data) and the projected population for 2019 was estimated using Census 2011. ¹The total number of children <5 years is 113,225, pregnant women 15-49 years is 102,200 and non-pregnant women 15-49 years is 369,826.

²Public health concern is defined as $\geq 20\%$ for underweight (children), $\geq 10\%$ for underweight (women), $\geq 40\%$ for anemia among non-pregnant women, and $\geq 40\%$ for anemia among pregnant women (WHO 2011). ³Anemia prevalence during pregnancy only available in 2 districts in Puducherry.

Figure 2. Trends in overweight/obesity & NCDs² 2015-2016, 2019-2021

Table 1. Overweight/obesity & NCDs² at district-level 2015-2016, 2019-2021

Category	Outcomes	Worst performing districts (pp) ³	Best performing districts (pp) ³	Highest burden districts (thousands) ⁴	No of districts with public health concern ⁵ (total=4)
		<i>Difference between (2019-2021) & (2015-2016)</i>	<i>Difference between (2019-2021) & (2015-2016)</i>	2019-2021	2019-2021
Children <5 years	Overweight/obesity	Yanam: +2.2 Puducherry: +2.1	Mahe: -12.0	Puducherry: 3 Karaikal: 1	0
	Overweight/obesity	Yanam: +15.4 Puducherry: +12.3	Mahe: -12.7	Puducherry: 175 Karaikal: 29	4
Women (15-49 years)	Hypertension	Mahe: +19.0 Yanam: +16.5	<i>Not Applicable⁶</i>	Puducherry: 82 Karaikal: 15	4
	Diabetes	<i>Not Available¹</i>		Puducherry: 69 Karaikal: 17	3
	Overweight/obesity	<i>Not Available¹</i>			
Men (15-54 years)	Hypertension	Mahe: +17.9 Puducherry: +7.0	Karaikal: -6.2 Yanam: -1.7	Puducherry: 117 Karaikal: 19	4
	Diabetes	<i>Not Available¹</i>		Puducherry: 79 Karaikal: 17	4

pp: percentage points. Source: NFHS-4 (2015-16) national report and data [IFPRI estimates] and NFHS-5 (2019-2021) national and state factsheets.

Note 1: As Puducherry is a Union Territory, NFHS 3 (2005-06) data are not available.

¹Indicates unavailability of data for a particular indicator in the specified NFHS round. Diabetes data for NFHS-4 are not included in the NFHS-5 factsheet because definition of diabetes is not comparable between NFHS-4 and 5.

²NCDs : non-communicable diseases.

³The difference is calculated only between districts that are comparable between 2015-2016 and 2019-2021.

⁴Burden: The headcount was calculated as the product of the overweight/obesity and NCDs prevalence and the total eligible projected population for each district in 2019. Prevalence estimates were obtained from NFHS-5 (2019-2021) and the projected population for 2019 was estimated using Census 2011.

⁵Public health concern is defined as prevalence $\geq 15\%$ for overweight/obesity (children), $\geq 20\%$ for overweight/obesity (women and men), $\geq 20\%$ hypertension (women and men), and $\geq 20\%$ diabetes (women and men). Source: WHO (2011).

⁶Prevalence did not decrease in any of the districts.

Figure 3. Trends in immediate determinants (%)
2015-2016, 2019-2021

Table 2. Immediate determinants at district-level
2015-2016, 2019-2021

Category	Immediate determinants	Worst performing districts (pp)	Best performing districts (pp)	Top coverage districts (%) ²
		<i>Difference between (2019-2021) & (2015-2016)</i> ¹	<i>Difference between (2019-2021) & (2015-2016)</i> ¹	2019-2021
Maternal determinants	Underweight women	<i>Not Applicable</i> ³	Yanam: -3.4 Mahe: -2.7	Mahe: 6.2 Puducherry: 8.1
	Consumed IFA 100+ days	Mahe: -11.5	Puducherry: +20.2 Karaikal: +17.0	Puducherry: 85.3 Karaikal: 81.4
IYCF practices	Early initiation of breastfeeding	Yanam: -19.9 Puducherry: -15.2	Mahe: +14.5 Karaikal: +9.9	Mahe: 82.4 Karaikal: 69.4
	Exclusive breastfeeding	<i>Not Available</i> ⁴		
	Timely introduction of complementary foods	<i>Not Available</i> ⁴		
	Minimum adequate diet	Yanam: -16.0 Karaikal: -15.1	Mahe: +17.0	Mahe: 37.8 Puducherry: 25.6
Diseases	Diarrhea in the 2 two weeks	<i>Not Applicable</i> ³	Puducherry: -8.4 Karaikal: -6.5	Mahe: 0.0 Karaikal: 1.6
	ARI in the 2 two weeks	Puducherry: +2.9	Mahe: -4.2 Yanam: -1.8	Yanam: 0.0 Mahe: 0.0

pp: percentage points. Source: NFHS-4 (2015-2016) state report and data [IFPRI estimates], and NFHS-5 (2019-21) national and state reports, factsheets, and data [IFPRI estimates]. Early initiation of breastfeeding, dietary diversity, minimum meal frequency, egg and/or flesh consumption, sweet beverage consumption, and bottle feeding of infants were estimated for NFHS-3 and -4 using last child data.

Note 1: As Puducherry is a Union Territory, NFHS 3 (2005-06) data are not available.

Note 2: Definitions of IYCF indicators are based on WHO guidelines.

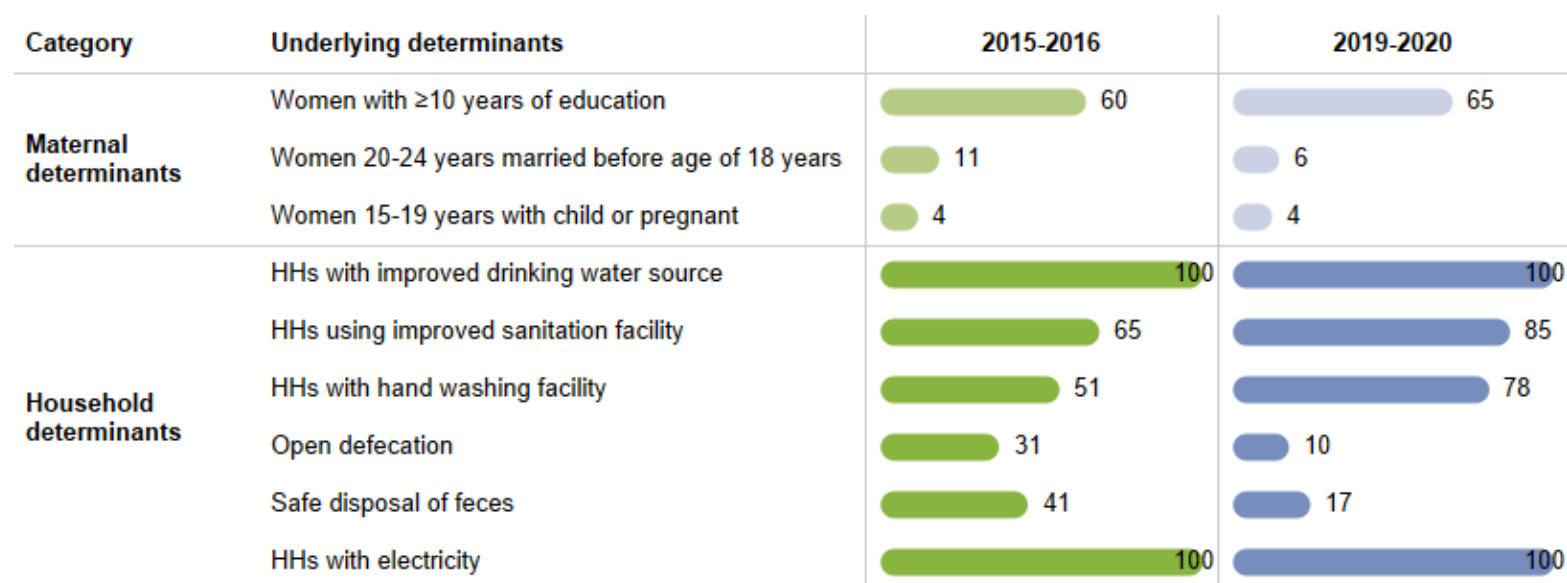

¹The difference is calculated only between districts that are comparable between 2015-2016 and 2019-2021.

²For all indicators, top coverage districts refer to the districts with the highest prevalence in immediate determinants, except for women with a BMI of 18.5 kg/m2, diarrhea in the last 2 weeks, and ARI in the last 2 weeks, for which it refers to the districts with the lowest prevalence in coverage.

³The prevalence did not increase for any district.

⁴Indicates unavailability of data for a particular indicator in the specified NFHS round.

Key takeaways

Children: Stunting and wasting prevalence declined by 4 and 12 percentage points (pp) from 2016 to 2021. Underweight declined by 7pp from 2016 to 2021. Anemia increased by 19pp from 2016 to 2021. Overweight/obesity increased by 2pp from 2016 to 2021.

Women: Underweight declined by 2pp from 2016 to 2021. Anemia in non-pregnant and pregnant women increased by 3pp and 17pp respectively, from 2016 to 2021. Overweight/obesity increased by 9pp from 2016 to 2021.

Men: Overweight/obesity increased by 6pp from 2016 to 2021.

Attention is needed to improve (%s in 2021):

- **Outcomes:** Stunting (20%) and anemia in children (64%); anemia in non-pregnant (56%) and pregnant (43%) women
- **Immediate determinants:** Minimum adequate diet (23%); minimum dietary diversity (34%)
- **Underlying determinants:** Women with ≥10 years education (65%)
- **Coverage of interventions:** Care seeking for ARI (64%); use of bed nets during pregnancy (24%); zinc during diarrhea (33%)

pp: percentage points. Source: NFHS-4 (2015-2016) state and national reports and data [IFPRI estimates] and NFHS-5 (2019-2021) state factsheet, state and national report, and data [IFPRI estimates].

Note: Interventions' coverage are based on the last child data.

¹The difference is calculated only between districts that are comparable between 2015-2016 and 2019-2021.

²Prevalence did not increase or decrease in any of the districts.

³Indicates unavailability of data for a particular indicator in the specified NFHS round.

⁴Prevalence of care seeking for ARI is only available for Puducherry district.

⁵Indicators postnatal care for women and babies are not comparable between NFHS-4 and 5

Indicator definition

Nutrition outcomes	Definition
Low birth weight^{3,5}	% live births in 5 years (y) preceding the survey with a reported birth weight <2.5 kilograms (kg), based on either a written record or the mother's recall
Stunting	% children 0-59 months (m) whose height-for-age z score < -2 standard deviations (SD)
Wasting	% children 0-59 m whose weight-for-height z score < -2SD
Severe wasting	% children 0-59 m whose weight-for-height z score < -3SD
Underweight children	% children 0-59 m whose weight-for-age z score < -2SD
Anemia among children	% children 6-59 m whose haemoglobin (Hb) <11.0 g/dl
Underweight women	% women 15-49 y whose Body Mass Index (BMI)<18.5 kg/m ² ; sample excluded pregnant women and women with a birth in the preceding 2 m
Anemia among non-pregnant women¹	% non-pregnant women 15-49 y whose Hb<12.0 g/dl
Anemia among pregnant women¹	% pregnant women 15-49 y whose Hb<11.0 g/dl
Overweight/obesity – children	% children 0-59 m whose weight-for-height z score > 2SD
Overweight/obesity – women	% women 15-49 y whose BMI ≥25.0 kg/m ² ; sample excluded pregnant women and women with a birth in the preceding 2 m
Overweight/obesity – men	% men 15-49 y whose BMI ≥25.0 kg/m ²
Hypertension among women^{2,3,10}	% women 15-49 y with elevated blood pressure (systolic ≥140 mm Hg or diastolic ≥90 mm Hg) or are currently taking medication to control blood pressure
Hypertension among men^{2,3,10}	% men 15-54 y with elevated blood pressure (systolic ≥140 mm Hg or diastolic ≥90 mm Hg) or are currently taking medication to control blood pressure
Diabetes among women¹⁰	% women 15-49 y with high (>140 mg/dl) or very high (>160 mg/dl) blood sugar or are currently taking medication to control blood sugar
Diabetes among men¹⁰	% men 15-54 y with high (>140 mg/dl) or very high (>160 mg/dl) blood sugar or are currently taking medication to control blood sugar
Immediate determinants	Definition
Underweight women	% women 15-49 y whose BMI<18.5 kg/m ² ; sample excluded pregnant women and women with a birth in the preceding 2 m
Consumed IFA 100+ days¹	% women 15-49 y who consumed iron folic acid (IFA) for 100 days or more during pregnancy for the most recent live birth in the 5 y preceding the survey
Consumed IFA 180+ days¹	% women 15-49 y who consumed IFA for 180 days or more during pregnancy for the most recent live birth in the 5 y preceding the survey
Early initiation of breastfeeding^{1,2,3,8,9}	% youngest children <2 y who started breastfeeding <1 hour of birth
Exclusive breastfeeding	% youngest children 0-5 m who were fed exclusively with breastmilk the previous day
Timely introduction of complementary foods	% youngest children 6-8 m living with their mother who received solid or semi-solid food and breastmilk
Continued breastfeeding at 2 years^{1,3,4,5,6}	% youngest children 12-23 m living with their mother who were fed breastmilk during the previous day
Minimum adequate diet^{2,3,4,5,9,10}	% youngest children 6-23 m who consumed a minimum acceptable diet during the previous day
Minimum dietary diversity^{1,2,3,4,5,9}	% youngest children 6-23 m who consumed foods and beverages from at least 5 out of 8 defined food groups during the previous day
Minimum meal frequency^{2,3,4,5,9,10}	% youngest children 6-23 m who consumed solid, semi-solid or soft foods (but also including milk feeds for non-breastfed children) at least the minimum number of times during the previous day
Eggs and/or flesh foods consumption^{1,2,3,4,5,9}	% youngest children 6-23 m who consumed egg and/or flesh food during the previous day
Sweet beverage consumption^{1,2,3,4,5,9}	% youngest children 6-23 m who consumed a sweet beverage during the previous day
Bottle feeding for infants^{1,2,3,4,5,9}	% youngest children 0-23 m who were fed from a bottle with a nipple during the previous day
Diarrhea in the last 2 weeks	% children <5 y who had diarrhea in the 2 weeks preceding the survey
ARI in the last 2 weeks	% children <5 y who had symptoms of acute respiratory infection (ARI) in the 2 weeks preceding the survey
Underlying determinants	Definition
Women with ≥10 years of education	% women 15-49 y with ≥10 y of schooling
Women 20-24 years married before age of 18 years¹	% women 20-24 y who were married when <18 y
Women 15-19 years with child or pregnant¹⁰	% women 15-19 y who were mothers or pregnant at the time of the survey
HHS with improved drinking water source	% population living in households whose source of drinking water is piped into dwelling/yard/plot, piped to neighbour, public tap/standpipe, tube well or borehole, protected dug well, protected spring, rainwater, tanker truck, cart with small tank, bottled water, or community RO plant
HHS using improved sanitation facility	% population living in households using flush to pipe sewer system, flush to septic tank, flush to pit latrine, ventilated improved pit (VIP)/biogas latrine, pit latrine with slab or twin pit/composting toilet, which is not shared with any other household
HHS with hand washing facility^{2,4,10}	% households where a place for washing hands with water and soap was present
Open defecation^{6,7}	% households that have no toilet facility/defecate in open space or field
Safe disposal of feces^{3,4,5}	% youngest children <5 y living with their mother whose stools were disposed of safely
HHS with BPL card^{3,5,6,7}	% households possessing a BPL card
HHS with electricity	% population living in households with electricity

Note: Unless specified, state and district estimates taken from NFHS-3 national/state report for NFHS-3, NFHS-4 national/state report or NFHS-5 factsheet for NFHS-4, and NFHS-5 national/state report or factsheet for NFHS-5.

¹Indicator estimated using NFHS-3 unit-level data (state level)

²Indicator estimated using NFHS-4 unit-level data (state level)

³Indicator estimated using NFHS-4 unit-level data (district level)

⁴Indicator estimated using NFHS-5 unit-level data state level

⁵Indicator estimated using NFHS-5 unit-level data (district level)

⁶Indicator estimated using NFHS-4 unit-level data for union territories as their summary reports are not available (state level)

⁷Indicator estimated using NFHS-5 unit-level data for union territories as their summary reports are not available (state level)

⁸Indicator estimated using NFHS-5 unit-level data for union territories as their summary reports are not available (district level)

⁹Indicator constructed following WHO guidelines

¹⁰Indicator not available in NFHS-3 and/or 4 tool or not comparable between NFHS-3/4 and 5

Indicator definition

Interventions	Definition
Demand for FP satisfied^{1,3,5}	% currently married women 15-49 years (y) with demand for family planning (FP) satisfied by modern methods
Iodized salt	% households using iodized salt
ANC first trimester	% women 15-49 y who received antenatal care (ANC) during the first trimester for the most recent live birth in the 5 y preceding the survey
≥ 4ANC¹	% women 15-49 y who received ≥4 ANC visits for the most recent live birth in the 5 y preceding the survey
Received MCP card¹⁰	% women 15-49 y who received a mother and child protection (MCP) card during pregnancy for the most recent live birth in the 5 y preceding the survey
Received IFA tab/syrup^{3,8}	% women 15-49 y who received IFA (given or purchased) during pregnancy for the most recent live birth in the 5 y preceding the survey
Tetanus injection¹	% women 15-49 y whose most recent live birth in the 5 y preceding the survey was protected against neonatal tetanus
Deworming- pregnancy^{3,8}	% women 15-49 y who took deworming medication during pregnancy for the most recent live birth in the 5 y preceding the survey
Weighing- pregnancy^{3,5,6,7}	% women 15-49 y who were weighed during ANC for the most recent live birth in the 5 y preceding the survey
Birth preparedness counselling^{1,2,3,4,5}	% women 15-49 y with a child 0-60 months (m) who had ≥1 contacts with a community health worker in the 3 m preceding the survey and were advised on birth preparedness
Breastfeeding counselling^{1,3,5,6,7}	% women 15-49 y who met with a community health worker in the last 3 m of pregnancy for the most recent live birth in the 5 y preceding the survey and were advised on breastfeeding
Counselling on keeping baby warm^{1,5,6,7}	% women 15-49 y who met with a community health worker in the last 3 m of pregnancy for the most recent live birth in the 5 y preceding the survey and were advised on keeping the baby warm
Cord care counselling^{5,6,7,10}	% women 15-49 y who met with a community health worker in the last 3 m of pregnancy for the most recent live birth in the 5 y preceding the survey and were advised on cord care
Food supplementation – pregnancy^{3,5}	% women 15-49 y with a child <6 y who received food supplements from ICDS during pregnancy
Health & nutrition education – pregnancy⁵	% women 15-49 y with a child <6 y who received health and nutrition education from ICDS during pregnancy
Malaria prevention- use of bed nets^{2,4,5,10}	% women 15-49 y who slept under a treated bed net during pregnancy of the most recent live birth in the 5 y preceding the survey
Institutional birth	% live births in the 5 y preceding the survey to women 15-49 y delivered in a health facility
Financial assistance (JSY)^{6,7,8,10}	% women 15-49 y who received financial assistance under Janani Suraksha Yojana (JSY) for the most recent live birth that took place in a health facility in the 5 y preceding the survey
Skilled birth attendant	% live births in the 5 y preceding the survey to women 15-49 y that were assisted by a skilled provider
Postnatal care for mothers¹⁰	% women 15-49 y who received postnatal care from a doctor/nurse/LHV/auxiliary nurse midwife (ANM)/midwife/other health personnel <2 days of delivery for the most recent live birth in the 5 y preceding the survey
Postnatal care for babies¹⁰	% most recent live births in the 5 y preceding the survey to women 15-49 y with a postnatal check for the newborn from a doctor/nurse/LHV/ANM/midwife/other health personnel <2 days of delivery
Food supplementation – postnatal^{3,5}	% women 15-49 y with a child <6 y who received food supplements from ICDS during breastfeeding
Health & nutrition education – postnatal^{3,5}	% women 15-49 y with a child <6 y who received health and nutrition education from ICDS during breastfeeding
Health checkup (ICDS)^{3,5}	% women 15-49 y with a child <6 y who received a health check-up from ICDS during breastfeeding
Full immunization	% children 12-23 m fully vaccinated based on information from either vaccination card or mother's recall
Vitamin A – early childhood¹	% children 9-35 m who received a vitamin A dose in the 6 m preceding the survey
Pediatric IFA^{3,4,5,10}	¹¹ % children 6-59 m who were given iron supplements in the 7 days preceding the survey ¹² % children 6-36 m who were given iron supplements in the 7 days preceding the survey
Deworming – early childhood^{3,4,5,10}	¹¹ % children 6-59 m who received deworming medication in the 6 m preceding the survey ¹² % children 6-36 m who received deworming medication in the 6 m preceding the survey
Care seeking for ARI	% children <5 y with fever or symptoms of ARI in the 2 weeks preceding the survey taken to a health facility or health provider
ORS during diarrhea	% children <5 y with diarrhea in the 2 weeks preceding the survey who received Oral Rehydration Solutions (ORS)
Zinc during diarrhea	% children <5 y with diarrhea in the 2 weeks preceding the survey who received zinc
Food supplementation (children 6-35 months)^{1,2,3,4,5}	% youngest children 6-35 m who received food supplements from ICDS in the 12 m preceding the survey
Weighing – early childhood^{3,5}	% children <5 y who were weighed at an anganwadi centre (AWC) or ICDS centre in the 12 m preceding the survey
Counselling on child growth^{3,5,10}	% mothers with a child <5 y who received counselling from an ICDS/anganwadi worker or ANM after they were weighed at an AWC in the 12 m preceding the survey
Preschool (AWC)^{3,5}	% children 36-71 m who went for early childhood care/preschool at an AWC in the 12 m preceding the survey
Health checkup (AWC)^{3,5}	% children <6 y who received health checkups from an AWC in the 12 m preceding the survey

Note: Unless specified, state and districts estimates taken from NFHS-3 national/state report for NFHS-3, NFHS-4 national/state report or NFHS-5 factsheet for NFHS-4, and NFHS-5 national/state report or factsheet for NFHS-5.

¹Indicator estimated using NFHS-3 unit-level data (state level)

²Indicator estimated using NFHS-4 unit-level data (state level)

³Indicator estimated using NFHS-4 unit-level data (district level)

⁴Indicator estimated using NFHS-5 unit-level data state level

⁵Indicator estimated using NFHS-5 unit-level data (district level)

⁶Indicator estimated using NFHS-4 unit-level data for union territories as their summary reports are not available (state level)

⁷Indicator estimated using NFHS-5 unit-level data for union territories as their summary reports are not available (state level)

⁸Indicator estimated using NFHS-5 unit-level data for union territories as their summary reports are not available (district level)

⁹Indicator constructed following WHO guidelines

¹⁰Indicator not available in NFHS-3 and/or 4 tool or not comparable between NFHS-3/4 and 5

¹¹Definition as per NFHS-3 and 4 construction

¹²Definition as per NFHS-5 construction

Disclaimer: The maps used in this Data Note are based on the districts in NFHS-5 factsheets/reports. The boundaries shown do not imply any official endorsement or acceptance by IFPRI.

ABOUT POSHAN

Partnerships and Opportunities to Strengthen and Harmonize Actions for Nutrition in India (POSHAN) is a multi-year initiative that aims to support the use of data and evidence in decision-making for nutrition in India. It is supported by the Bill & Melinda Gates Foundation and led by IFPRI in India.
<http://poshan.ifpri.info/>

ABOUT DATA NOTES

POSHAN Data Notes focus on data visualization to highlight geographic and/or thematic issues related to nutrition in India. They draw on multiple sources of publically available data.
