

Finding story ideas

Potential sources of stories include:

1. Contacting [CGIAR gender experts](#) on this map – for CGIAR communicators, especially the gender research coordinator in your center
2. Investigating [story leads identified by gender researchers in 2022](#)
3. Following up on outcome stories from CGIAR's "[CGIAR@50](#)" campaign, and checking on [the initial story leads](#)
4. Reviewing the [list of submissions](#) for [gender and breeding case studies](#). Contact [Marianne Gadeberg](#) if you need to connect with the Gender Platform researchers running this project
5. Digging into the gender highlights from previous CGIAR research programs (ending in 2021) such as
 - a. "golden eggs" from previous CGIAR research program on [roots, tubers and bananas](#)
 - b. stories from previous CGIAR research program on [forests, trees and agroforestry](#)
 - c. on [policies, institutions and markets](#)
6. Checking through [the book synthesizing past CGIAR gender research](#)
7. Joining the public Facebook group of [Gender Responsive Agricultural and Global Development Researchers](#)
8. Investigating [gender-responsive work within crops and technologies](#) that has not yet been turned into a story
9. Looking for research/projects that used gender-responsive tools or methods to design, deploy and evaluate agricultural technologies (in the training blog resources handout and in [this paper](#)), or contacting its authors
10. Looking for research/projects that used gender-responsive tools or methods for value chains, markets or entrepreneurship (in the training blog resources handout).
